you can do it Damn It is difficult even for aeronautical engineers So when scientists talk to other scientists they can talk in their language and explain everything to each other But who will teach us normal everyday people what the hell is going on with our bodies I will tell you who another layperson But why fun Because six year olds refuse to learn anything if it s not fun enough But why a vegetarian book Because it is so out of fashion that nobody is talking about it People are talking about veganism they talk about carnivores about low carb keto but nobody likes to talk about plain old vegetarians As if these people don t exist
