Intellectual Property Protection of Traditional Cultural

Expressions Luo Li, 2014-04-22 The work reviews issues concerning the protection of folklore through the intellectual property legal system then explores two main issues in the protection of Chinese folklore The first issue is the influence of Chinese traditional culture on the Chinese intellectual property legal system and Chinese society The second concerns the deficiencies of the Chinese intellectual property system with regard to folklore Both issues are examined through a survey on the weak public recognition of intellectual property law and folklore in Chinese society The book also reveals the practical issues that have arisen in Southwest China through case studies After analysing these issues the work designs a model law

specifically for folklore and also provides suggestions for how the current intellectual property legal system could establish a comprehensive legal protection system for folklore Furthermore the work shows that its proposed model law is effective in practice by resolving the issues in the case studies presented

Destruction Lucia Allais,2018-10-16 How historical preservation efforts to protect architectural monuments arose in the twentieth century The twentieth century was highly destructive but from its landscapes of ruins was born a new architectural type the cultural monument In the wake of World War I an international movement arose which aimed to protect architectural monuments in large numbers and regardless of style hoping not only to keep them safe from future conflicts but

also to make them worthy of protection from more quotidian forms of destruction An evolving group including architects intellectuals art historians archaeologists curators and lawyers grew out of the new diplomacy of the League of Nations During and after World War II it became affiliated with the Allied Military Government and was eventually absorbed by the UN as UNESCO By the 1970s this organization had begun granting World Heritage status to a global register of significant sites from buildings to bridges shrines to city centers ruins to colossi Examining key episodes in the history of this preservation effort including projects for the Parthenon the Cathedral of St L the temples of Abu Simbel and the Bamyian Buddahs Lucia Allais demonstrates how the group deployed the notion of culture to shape architectural sites and how architecture in turn shaped the very idea of global culture Designs of Destruction emphasizes how the technical project of ensuring various buildings longevity jolted preservation into establishing a transnational set of codes values and practices At the same time this paradoxically helped integrate technologies of destruction from bombs to bulldozers into cultural governance Designs of Destruction not only offers a fascinating narrative of cultural diplomacy based on extensive archival findings it also contributes an important new chapter in the intellectual history of modernity by showing the manifold ways architectural form is charged with concretizing abstract ideas and ideals even in its destruction
