INTRODUCTION

AID EVAPORATION Dr. Litha Musyimi-Ogana, 2023-06-29 Aid Evaporation is a new notion It is based on an academic study that comprehensively examined how ODA is governed from the source to the destination Key ODA parameters emerged from the existing ODA governance frameworks namely mechanism ideology development approach and processes By unpacking elements contributing to aid ineffectiveness through these parameters exploring the existence of the aid evaporation and examining the key enablers of ODA Evaporation the study discovered supply side factors contributed significantly to Aid ineffectiveness It exposed different AID Evaporation enablers which play different hidden functions such as ODA Door Openers Appetizers Softeners Sponges Convertors Controllers Distorters as well as Carrot and Stick among others Key findings revealed that the prevailing perception that aid ineffectiveness was a demand side problem was only part of the story because supply side challenges were probably more responsible for billions of ODA that could not be accounted for It has recommended the re writing of the narrative that ODA ineffectiveness is predominantly premised on demand side by incorporating supply side factors Findings demonstrated that while there were indeed demand side challenges such as bad governance corruption and lack of strong institutions there were also supply donor side challenges such as over reliance of donor's own inefficient ODA governance frameworks as well as ODA delivery mechanisms the entrenchment of bilateral interest in ODA processes and geo political interests among other factors In this regard the study confirmed that the 62% of the ODA that could not be accounted for according to existing literature was

either held up in the pipeline or evaporates mostly from the supply side This finding brought clarity on the weak impact of ODA and corroborated with existing literature on the mystery of unaccounted ODA While the notion of aid evaporation emerged as an attribution and part of a reflection on the problem of ODA dissipation at the preliminary stage of the literature review it became the central issue of focus throughout the research investigation which involved substantive field work to bring clarity on the problem The study has made theoretical and practical contributions to the existing concepts on ODA governance and proposed a new concept namely the Supply Baggage Concept The new concept should inform the Post Paris era in achieving Aid effectiveness by weding out Evaporation using the Aid Evaporation Detection Framework proposed in this book

Waddington, Bryan Bonaparte, 2024-09-07 This collection addresses intersections and gaps between practice theory and research that both connect and divide compassion and pedagogies In foregrounding practice it makes an important contribution to the growing call for universities and educators to adopt inclusive student centred approaches that challenge us to fundamentally re think what universities do It celebrates the role of students as co creators of knowledge locating them at the heart of what pedagogies of compassion in higher education should feel like and look like It examines how compassion can become both critical and strategic in order to disrupt systems and orthodoxies that are no longer fit for purpose in a post pandemic world The ultimate goal the book aims to address is the need for humane universities driven by compassion rather than profit which can help to build fairer and more socially just societies The book extends the theoretical and practical discussions of compassion as a fundamental organizing principle in higher education It brings fresh interdisciplinary thinking theories and approaches including the neuroscience of compassion classical Eastern philosophies intersectional compassion sustainability and environmental stewardship It also includes critical reflection on experiences challenges barriers and enablers across multiple levels and perspectives These range from reflections on compassion in the classroom to compassion in the boardroom as well as in the many other spaces and places where learning occurs It offers a creative collection of essays on compassionate practices in higher education and appeals to anyone who is concerned about the moral standing of the university For some time now we have been told that universities must be viewed on the business model but this has only discouraged faculty students and staff As the contributors show however the very idea that teaching and educational practices could be more closely linked to compassion is definitely appealing and it gives us a more inspiring way of thinking about the university of the future Richard J White Creighton University Omaha NE USA Supply Chain and Logistics
