Working-Class Masculinities in Australian Higher Education Garth Stahl,2021-09-06 This book takes a critical view of masculinities through an investigation of first in family males transitioning to higher education Drawing on six in depth longitudinal case studies the focus is on how young men from working class backgrounds engage with complex social inequalities as well as the various capitals they draw upon to ensure their success Through the longitudinal approach

the work problematizes the rhetoric of poverty of aspirations and foregrounds how class and gender influence the lives and futures of these young men. The book demonstrates how the aspirations of these young men are influenced by a complex interplay between race, ethnicity, religion, masculinity, and social class. Finally, the book draws connections between the lived experiences of the participants and the implications for policy and practice in higher education. Drawn from a larger research project, each case study compels the reader to think critically regarding masculinities in relation to social practices, institutional arrangements, and cultural ideologies. This is essential reading for those interested in widening participation in higher education, gender theory, masculinities, longitudinal research, and social justice.

Ganit Mathematics □ 8 Lata Wishram, GANIT MATHEMATICS series consists of ten textbooks: two textbooks for Primer A and B, eight textbooks for classes 1-8. This series is strictly based on the syllabus prescribed by the Council for the Indian School Certificate. The series has been developed to guide the young minds to observe and experience mathematics all around them. Each concept has been related to everyday life in order to develop a spirit of curiosity and discovery. Concepts are gradually built up with easy-to-follow steps and plenty of examples.
