1

Locate the hoist directly above the lifting point of the load before lifting

Do not operate if it's tagged out

Crane should be inspected on regular basis for cracks, faulty wiring, worn ropes and defective parts

Maintain a safe distance between machine or load

Ask your Supervisor, if you're confused

Never exceed the rated limit

Do not get distracted by anything

Be sure employees understand each other clearly

Center of gravity shall be placed equally between the pick points

If a load appears to be slung improperly, lower it and have it adjusted

Do not swing the load

If you're sick, do not work and inform your Supervisor

It discusses issues such as safety plans, responsibilities, supervision and management, operations training, manufacture, crane safety devices and regulations in some detail as they relate to crane management.
