SAFETY PRECAUTIONS

-  When changing, repairing or shoring of or when taking or samples, it must be guaranteed that no oil can escape onto the ground, penetrate the ground or surface water or enter the drainage system.
-  Oil deposits under overhead cranes may be removed at machine or should only by experts.
-  Prolonged contact with lubricants can cause injury to your skin. Use a protective skin cream.
-  After prolonged operation the lubricant and surface of the gear units may reach temperatures which can cause skin burns. After working on hot components wear protective clothing & a protective gloves.
-  The applicable national, local and plant specific regulations and requirements concerning accident prevention and environmental protection are to be observed.
-  To prevent faults it is necessary to carry out the regular maintenance and inspection work prescribed. Any changes compared with normal operation (higher power input, temperatures or vibrations, unusual noises or smells, response of monitoring devices etc.) are an indication that the unit is not functioning properly. To avoid faults which could result in injury to people or damage to property, the maintenance staff responsible must be notified immediately. In case of doubt switch off the relevant item of equipment and ensure it cannot be restarted or again.
-  To prevent damage from overheating, oil and dust deposits should be regularly removed from gear unit surfaces and oil / water cooling surfaces.
-  Do not touch rotating components.
