Crash Participants Guide:

Crash Participant's Guide Steven Case,2009-12-15 When heaven and earth collide there s a crash That crash is the place we live in every day when we invite God s will to be done on earth as it is in heaven and there s no better place to be if you want a glimpse of the Kingdom of God Here students are given a book that helps lead them in prayer to the point of impact so they can experience God in their everyday lives and youth workers get lessons activities and other ideas to help them incorporate Crash into their ministries *I AM Standing Up* Luke Lang,2009-05-26 Maybe you have days when you don t feel so good about yourself You re not as tall or thin as you d like or maybe you don t quite fit in or you just get left out Well you ll start to feel a lot better about yourself once you start reading about Luke Luke Lang calls himself a freak of nature He s a grown man who is the height of an average fifth grader but that s not what makes him a freak He s also about as wide as the average Sumo wrestler but sadly too uncoordinated to actually compete as a Sumo wrestler Luke knows what it s like to feel left out or left behind But he s got a great sense of humor about his life s misadventures and he s sharing the hysterical stories with you in the hopes that you ll feel encouraged not just because you re not as freaky as Luke but because you ll see that God can do extraordinary things through people who are pretty ordinary While you re reading Luke s embarrassing stories like the time he got beat up by a girl in Karate class or the time he was fighting for his life at Boy Scout camp you ll learn a little about God s love and grace and you ll be reminded that you were created on purpose for a purpose

Turner,2012-07-09 Until recently a handbook on neurosociology would have been viewed with skepticism by sociologists who have long been protective of their disciplinary domain against perceived encroachment by biology But a number of developments in the last decade or so have made sociologists more receptive to biological factors in sociology and social psychology Much of this has been encouraged by the coeditors of this volume David Franks and Jonathan Turner This new interest has been increased by the explosion of research in neuroscience on brain functioning and brain environment interaction via new MRI technologies with implications for social and psychological functioning This handbook emphasizes the integration of perspectives within sociology as well as between fields in social neuroscience For example Franks represents a social constructionist position following from G H Mead s voluntaristic theory of the act while Turner is more social structural and positivistic Furthermore this handbook not only contains contributions from sociologists but leading figures from the psychological perspective of social neuroscience
