Motherhood and the Law Harry Willekens, Kirsten Scheiwe, Theresa Richarz, Eva Schumann, 2019 Who is a child's legal mother Must a child have exactly one mother can it have two or three or can it have two fathers but no mother Or has the concept of motherhood become obsolete and should we just talk of parenthood in a

gender neutral way Questions such as these would have appeared esoteric only a few decades ago but as a result of new social developments such as frequent family reconstitutions gay and lesbian emancipation or surrogacy and of technological innovations such as egg and embryo donations they have become issues in a vehement debate The interdisciplinary contributions to this book focus on the legal definition of motherhood on the way in which legal conceptions structure the social discourse on motherhood and vice versa and on the influence of legal rules on power relations between mothers fathers children and the state Among the issues addressed are the challenges to our understanding of the legal regulation of motherhood by developments in reproductive medicine the challenges to our understanding of the legal regulation of motherhood by parental constellations deviating from the mother father model single motherhood by choice same gender parenthood multiple parenthood the exercise of parental rights in case of parental separation and the impact of legal rules on the bargaining positions of mothers and fathers

Creating New Families Jenny Kenrick, Caroline Lindsey, Lorraine Tollemache, 2018-04-24 *Creating New Families* is intended to reflect the practice of the specialist multi disciplinary Fostering and Adoption team in the Child and Family Department of the Tavistock Clinic. The team is firmly rooted in an approach which values interdisciplinary working for the contribution which the thinking of each discipline makes to the overall endeavour with the child and family. It also places great importance on multi agency collaboration especially with social services and education without which no intervention with this group of children can succeed. The book represents the differing ways in which members contribute to the work of the team with individual and joint accounts by clinicians of the ways in which their therapeutic practice has evolved and about the theoretical thinking on which it is based.
