Creating Tomorrows Schools Today Education Our Children Their Futures:

Creating Tomorrow's Schools Today Richard Gerver, 2012 *Creating Tomorrow's Schools Today* Richard

Gerver, 2014-10-25 It's time to focus on the needs of our children not the whims of our politicians to provide a way forward for a new landscape in education. Is our education system working? What future are we preparing our children for? What future do we NEED to prepare our children for? Are we at risk of failing a generation? In this updated edition of renowned education speaker Richard Gerver's book, we are faced with these worrying questions and many more regarding the schools our children are attending, the curriculum they are following, and the testing system used to categorise them. In this rousing call for educational revolution, Richard argues passionately that we must fight harder for our children's futures and we must do it today. Richard describes the strategies he used when he was brought in as head teacher to turn around Grange Primary school. It was there that he implemented his vision for a school system that caters for every child, a system that helps nurture self-confidence, self-worth, creativity, innovative thinking, team working, and communication skills, all key employability skills that children will need in the fast-moving world of technology and information they are growing up in. Richard is now the second most successful education speaker in the world, behind Sir Ken Robinson, who describes Richard as one of the clearest and most passionate voices for radical change in education and wrote the foreword for this book. Richard has updated *Creating Tomorrow's Schools Today* based on his visits to schools on every continent, his conversations on education with teachers and industry leading visionaries such as Steve Wozniak, and in the context of an education system that he fears is forgetting the future we need to prepare our children for. Reforms, tweaks, and new policies are not enough; a radical transformation is needed. If you read only one Education manifesto in the next year, this is it. Join the conversation. Edvision.

Best of the Best Isabella Wallace, 2018-02-15 The Best of the Best series brings together for the first time the most influential voices in education in a format that is concise insightful and accessible for teachers Keeping up with the latest and best ideas in education can be a challenge as can putting them into practice but this highly

acclaimed series is here to help Each title features a comprehensive collection of brief and accessible contributions from some of the most eminent names in education from around the world In this third volume Wallace and Kirkman explore the core concept of engagement an essential facet of effective learning both for learners and for teachers and share practical realistic cross curricular and cross phase strategies to make the most of these important insights Engagement whether of the teacher or the learners can t be compelled and will always be contingent on the complexities of motivation Indeed it could be argued that it is teacher engagement which is the key to successful learning Such engagement can be facilitated by encouraging professional dialogue between staff or it may be that the school s high expectations alone could encourage in its teachers a sense of professional empowerment But how do we recognise learner engagement and what can we do to encourage it From this compendium of expert voices emerge three important themes that teachers engagement and positive example should be seen as a prerequisite for establishing learner motivation that learners interest needs to be actively engaged whether by meaningful challenge or by tapping into their natural curiosity and that an expectation of appropriate behaviour must precede expectations of engagement In this volume you will find many practical suggestions of ways to apply these ideas both in the classroom and in the staffroom Each contributor has provided a list of further reading so you can dig deeper into the topic and in addition the Teacher Development Trust offer their advice on how to plan effective CPD and responsive changes to practice based on the contributors suggestions Contributions include Sir Tim Brighouse argues that it is teacher engagement specifically their collaborative evaluation dialogue and planning which is the key to successful learning Dr Bill Rogers advocates a non confrontational approach and illustrates how the teacher s verbal communications can be more effective when they are descriptive and assertive rather than imperative and confrontational Vic Goddard suggests that a bottom up staff led approach to CPD can be a more motivating catalyst for teacher engagement than that which is top down and senior leadership team led Sue Cowley urges teachers to be responsive adaptable creative and flexible in the classroom and instead of focusing on what students need to change to take control of their teaching and decide what they need to change about themselves Richard Gerver discusses his passionate belief that teachers and school leaders should trust in their profession and their children more and build a culture that shouts about an assumption of excellence Andy Cope advises that teachers should focus on how they wish to be in order to achieve the energy and empowerment to engage more effectively with their to do list Professor Bill Lucas focuses on the numerous ways that schools can encourage parental engagement in their children s learning Ian Gilbert points out that in order to encourage engaged behaviour we need first to banish classroom boredom and that the opposite of boring in a learning context should be challenging Professor Susan Wallace focuses on teacher behaviour suggesting that one of the most powerful ways of encouraging engagement is for the teacher to model the desired attitude by presenting themselves as enthusiastic and highly motivated
