An Internet for the People Jessa Lingel,2022-06-14 How craigslist champions openness democracy and other vanishing principles of the early web Begun by Craig Newmark as an e mail to some friends about cool events happening around San Francisco craigslist is now the leading classifieds service on the planet It is also a throwback to the early internet The website has barely seen an upgrade since it launched in 1996 There are no banner ads The company doesn't profit off your data An Internet for the People explores how people use craigslist to buy and sell find work and find love and reveals why craigslist is becoming a lonely outpost in an increasingly corporatized web Drawing on interviews with craigslist insiders and ordinary users Jessa Lingel looks at the site's history and values showing how it has mostly stayed the same while the web around it has become more commercial and far less open She examines craigslist's legal history describing the company's courtroom battles over issues of freedom of expression and data privacy and explains the importance of locality in the social relationships fostered by the site More than an online garage sale job board or dating site craigslist holds vital lessons for the rest of the web It is a website that values user privacy over profits ease of use over slick design and an ethos of the early web that might just hold the key to a more open transparent and democratic internet

The Know-It-Alls Noam Cohen,2017-11-07 Included in Backchannel's WIRED.com Top Tech Books of 2017 An important book on the pervasive influence of Silicon Valley on our economy culture and politics New York Times How the titans of tech's embrace of economic disruption and a rampant libertarian ideology is fracturing America and making it a meaner place In The Know It Alls former New York Times technology columnist Noam Cohen chronicles the rise of Silicon Valley as a political and intellectual force in American life Beginning nearly a century ago and showcasing the role of Stanford University as the incubator of this new class of super geeks Cohen shows how smart guys like Jeff Bezos Peter Thiel Sergey Brin Larry Page and Mark Zuckerberg fell in love with a radically individualistic ideal and then mainstreamed it With these very rich men leading the way unions libraries public schools common courtesy and even government itself have been pushed aside to make way for supposedly efficient market based encounters via the Internet Donald Trump's election victory was an inadvertent triumph of the disruption that Silicon Valley has been pushing Facebook and Twitter eager to entertain their users turned a blind eye to the fake news and the hateful ideas proliferating there The Rust Belt states that shifted to Trump are the ones being left behind by a meritocratic Silicon Valley ideology that promotes an economy where in the words of LinkedIn founder Reid Hoffman each of us is our own start up A society that belittles civility empathy and collaboration can easily be led astray The Know It Alls explains how these self proclaimed geniuses failed this most important test of democracy
