Crossings Nietzsche And The Space Of Tragedy:

Crossings John Sallis, 1991-04-09 Boldly contesting recent scholarship Sallis argues that *The Birth of Tragedy* is a rethinking of art at the limit of metaphysics His close reading focuses on the complexity of the Apollinian Dionysian dyad and on the crossing of these basic art impulses in tragedy Sallis effectively calls into question some commonly accepted and simplistic ideas about Nietzsche's early thinking and its debt to Schopenhauer and proposes alternatives that are worth considering Richard Schacht *Times Literary Supplement* *The Thought of John Sallis* Bernard Freydberg, 2012-07-25 John Sallis is one of America's preeminent and most original contemporary philosophers The absence until now of a comprehensive work on Sallis has constituted a glaring oversight in philosophical scholarship *The Thought of John Sallis* is both an introduction for students new to his work and a valuable resource for scholars needing a systematic consideration of Sallis's wide-ranging thought Sallis's work possesses an intrinsic power and originality as well as deep interpretive insight This book is a descriptive and critical journey through his thought providing an overview for readers who wish to gain a sense of its sweep along with discrete sections on particular philosophical disciplines for readers whose interests are more specific It grapples with the challenges Sallis's thought presents making them explicit and opening them up to further consideration And it attempts to locate his thought within both contemporary continental philosophy and philosophy as a whole Essential for any student of continental philosophy *The Thought of John Sallis* expounds on his work in a manner that increases access honors its depth and opens up unexplored possibilities for philosophy Life as Art Zachary Simpson, 2012-09-27 *Life as Art* brings the resources of contemporary aesthetics since Nietzsche to bear on the problems of how one integrates the aesthetic emphases of meaning liberation and creativity into one's daily life By linking together the aesthetic and ethical accounts of critical theorists phenomenologists and existentialists into a coherent view on the artful life *Life as Art* shows the ways in which much of contemporary Continental theory has been concerned with alternative ways of constructing one's own life Seen as a unified phenomenon life as art signifies an active attempt to create a life which bears the resistance openness and creativity found in artworks Nietzsche's Affirmative Morality Peter Durno Murray, 2015-06-03 This book argues that Nietzsche bases his affirmative morality on the model of individual responsiveness to otherness which he takes from the mythology of Dionysus The subject is not free to choose to avoid such responding to the demands of the other Nietzsche finds that the basic mode of responding is pleasure This feeling as a basis for morality underlies the morality which is true to the earth and the major concepts of will to power eternal return and amor fati The priority of otherness makes all thought ethical and not only aesthetic The basis of all meanings combines the fundamental impulse of responding outwards with an immediate complement in the individual interpretation world This is specifically ethical because the recognition of our own historical specificity arises as a result of the refusal of others to become mere differences within our notion of the Same and through their demand that we become who we are in the recognition of their separate existence **Mapping the Present**

Stuart Elden,2002-01-01 In a late interview Foucault suggested that Heidegger was for him the essential philosopher Taking this claim seriously Mapping the Present assesses the relationship between these two thinkers particularly on the issue of space and history It suggests that space and history need to be rethought and combined as a spatial history rather than as a history of space In other words space should become not merely an object of analysis but a tool of analysis The first half of the book concentrates on Heidegger from the early occlusion of space through the politically charged readings of Nietzsche and Holderlin to the later work on art technology and the polis which accord equal status to issues of spatiality Foucault's work is then rethought in the light of the analysis of Heidegger and the project of a spatial history established through re readings of his works on madness and discipline

The Return of Nature John Sallis,2016-09-30 A reflection on the urgent need for a new philosophical understanding of and relationship with nature John Sallis dismantles the traditional conception of nature in this book of imagination and the cosmos In the thought of Emerson Hegel and Schelling Sallis discerns the seeds of an understanding of nature that goes against the modern technological assault on natural things and opens a space for a revitalized approach to the world He identifies two fundamental reorientations that philosophical thought is called on to address today the turn to the elemental in nature and the turn from nature to the cosmos at large He traces the elusive course of the imagination as if coming from nowhere and describes the way in which it bears on the relation of humans to nature Sallis's account demonstrates that a renewal of our understanding of nature is one of the prime imperatives we demand from philosophy today Inspiring for anyone looking to open up their mind to the reflection on other ways to live more closely in tune with their own nature and to the nature that is around them Phenomenological Reviews

Composing the Soul Graham Parkes,1994 A century and a half after his birth Nietzsche's importance and relevance as a thinker is greater than ever before and yet a major perspective on his life and work has been left untried the psychological approach Composing the Soul is the first study to pay sustained attention to Nietzsche as a psychologist and to examine the contours of his psychology in the context of his life and psychological makeup Featuring all new translations of quotations from Nietzsche's writings Composing the Soul reveals the profundity of Nietzsche's lifelong personal and intellectual struggles to come to grips with the soul Extremely well written this landmark work makes Nietzsche's life and ideas accessible to any reader interested in this much misunderstood thinker

Zarathustra's Last Supper Weaver Santaniello,2023-01-06 This book explores the historical contextualization of Nietzsche's thought focusing on Nietzsche's controversial Thus Spoke Zarathustra The fourth part of Nietzsche's Zarathustra consists of Zarathustra's encounter with eight higher men whom Zarathustra meets in succession on his path during the day The prophet then invites each individual to his cave for the evening festivities

culminating in a blasphemous festival in which his guests worship an ass as God Revealing each guest s specific characteristics and very distinct roles Santaniello also attempts to discern who these guests are or represent historically through glimpsing the characteristics specific to each representative guest as portrayed by Nietzsche and through careful textual analysis comparison with Nietzsche s other works historical evidence and previous scholarly research This unique exploration of Thus Spoke Zarathustra offers students and researchers alike an invaluable new contribution to Nietzsche studies

Crises in Continental Philosophy Arleen B. Dallery,Charles E. Scott,1990-10-02 This book punctuates the moments of crisis in continental thought from the foundational crisis of reason in Husserl s call for a rigorous science of phenomenology to the current crisis of postmodernism and its rejection of Husserl s metanarrative of history and rationality The mediating links between these moments is the centrality of the epochal history of Being the power of cultural and disciplinary practices and the dispersal of meaning in the post Husserlian and post subjective philosophies of Heidegger Foucault Derrida and others Included here are the thoughts of leading scholars who critically discuss Husserl s analysis of the crisis of Western thought and the importance of the concepts of world in Husserl s early writings The authors analyze the deprivileging of philosophy as social critique through the text of Husserl Habermas Foucault and recent feminist theory They examine the end of the epistemological and morally autonomous subject in continental thought Together these thoughts articulate multiple points or moments of crisis without cure or end

Embodying Transformation Maryrose Casey,2015-06-01 The essays in this collection explore transcultural events to reveal deeper understandings of the dynamic nature power and affect of performance as it is created and witnessed across national and cultural boundaries Focusing on historical and contemporary public events in multiple contexts contributors offer readings of transcultural exchanges between Europe Asia and the Middle East between colonisers and the colonised and back again In the process the authors explore questions of aesthetics cultural anxiety cultural control and how to realise intentions in performance practice

A Companion to Continental Philosophy Simon Critchley,William R. Schroeder,1998-06-08 Covering the complete development of post Kantian Continental philosophy this volume serves as an essential reference work for philosophers and those engaged in the many disciplines that are integrally related to Continental and European Philosophy

Looking Away Rei Terada,2009-04-30 In Looking Away Rei Terada revisits debates about appearance and reality in order to make a

startling claim that the purpose of such debates is to police feelings of dissatisfaction with the given world. Focusing on romantic and post romantic thought after Kant, Terada argues that acceptance of the world as is is coerced by canonical epistemology and aesthetics. In guilty evasions of this coercion, post Kantian thinkers cultivate fleeting aberrant appearances, perceptual experiences that do not present themselves as facts to be accepted and therefore become images of freedom. This phenomenophilia she suggests informs romanticism and subsequent philosophical thought with a nascent queer theory. Through graceful readings of Coleridge's obsession with perceptual ephemera or spectra recorded in his Notebooks, of Kant's efforts in his First and Third Critiques to come to terms with the given world, of Nietzsche's responses to Kant and his meditations on ephemeral phenomenal experiences and of Adorno's interpretations of both Nietzsche and Kant, Terada proposes that the connection between dissatisfaction and ephemeral phenomenality reveals a hitherto unknown alternative to aesthetics that expresses our right to desire something other than experience as is, even those parts of it that really cannot be otherwise.

Aesthetics After Metaphysics Miguel Beistegui, 2012-08-21. This book focuses on a dimension of art which the philosophical tradition from Plato to Hegel and even Adorno has consistently overlooked: such was its commitment, explicit or implicit, to mimesis and the metaphysics of truth. It presupposes, De Beistegui refers to this dimension which unfolds outside the space that stretches between the sensible and the supersensible, the space of metaphysics itself as the hypersensible and shows how the operation of art to which it corresponds is best described as metaphorical. The movement of the book then is from the classical or metaphysical aesthetics of mimesis (Part One) to the aesthetics of the hypersensible and metaphor (Part Two). Against much of the history of aesthetics and the metaphysical discourse on art, he argues that the philosophical value of art doesn't consist in its ability to bridge the space between the sensible and the supersensible or the image and the Idea and reveal the sensible as proto-conceptual, but to open up a different sense of the sensible. His aim then is to shift the place and role that philosophy attributes to art.

Responding to Men in Crisis, **Historical Dictionary of Aesthetics** Dabney Townsend, 2006-09-05. Aesthetics is not a factual discipline; there are no aesthetic facts. The word itself is derived from the Greek word for feeling, and the discipline arises because of the need to find a place for the passions within epistemology, the branch of philosophy that investigates our beliefs. Aesthetics is more than just the study of beauty; it is a study of that which appeals to our senses, most often in connection with the classification, analysis, appreciation, and understanding of art. The *Historical Dictionary of Aesthetics* covers its history from Classical Greece to the present, including entries on non-western aesthetics. The book contains a chronology, a list of acronyms and abbreviations, an introductory essay, a bibliography, and hundreds of cross-referenced dictionary entries on the main concepts, terminology, important persons, philosophers, critics, and artists, and the rules and criteria we apply in making judgments on art. By providing concise information on aesthetics, this dictionary is not only accessible to students but it provides details and facts to specialists in the field.
