Power Paolo Urio, 2024-10-19 The second edition of this book updated to February 24 2024 presents a comprehensive evaluation of the strategy implemented by China to manage its modernization process The author evaluates to what extent the economy has been developed whether the imbalances due to the priority given to economic development have been corrected and whether the improvements of science and technology have allowed China to develop world class high tech sectors and a modern defence Clearly the end of the XX Century saw the fulfilment of Zhou En Lai's four modernizations i.e. the acquisition of power resources that fulfilled Mao's proud 1949 statement we stood up thereby projecting China into the international arena as a re-emerging world power The author insists on the fundamental difference between American and Chinese ideologies as the main drivers of their foreign policy i.e. the extreme rigidity of the former compared to the remarkable flexibility and adaptability of the latter He further explains the consequences of the increasingly aggressive American foreign policy i.e. the US pretence to act as the leader of the existential struggle between democracy and dictatorship This posture reached its apex during the Ukrainian and the Middle East crises that unveiled the irreversible decline of the West and have become two formidable accelerators of the transition from the unipolar world America made to the multipolar world promoted by China Russia and the BRICS *Routledge Handbook of Chinese and Eurasian*

Examining the South China Sea Disputes Murray Hiebert, 2015-11-13 The Center for Strategic and International Studies CSIS hosted its fifth annual South China Sea conference in July 2015 This compilation features papers from some of the top experts in the United States and Asia who presented during the day's panels Bill Hayton Bonnie Glaser and Wu

Shicun discuss recent developments in the South China Sea Pham Lan Dung and Tran Huu Duy Minh explore legal issues surrounding the disputes and Ian Storey Patrick Cronin Renato Cruz de Castro and Peter Jennings examine various aspects of the military balance and regional order America and the China Threat Paolo Urio,2020-01-01 The US has historically disguised to itself and to others the true nature of its relations with those nations that stood in the way of its ambitions Reversing the order of cause and effect it has projected fear of harm from other nations even as it was expanding its dominion over them With the collapse of the Soviet Union which was so to be feared that the American people could even be told they would be better dead than Red the US rejoiced in the belief that the world was at last under its uncontested leadership celebrating Francis Fukuyama's then acclaimed book *The End of History* and proclaiming perhaps even believing that it alone can assure peace stability and prosperity in the international system However at the beginning of the 21st century a formidable new competitor emerged China Now we hear the fear stoked mantra The Chinese are coming But is China really a threat to the US or just to its sole superpower status This book debunks among many others the myth of the universality of US values and the myth of the imperial dictatorial and state capitalist character of today's China It explains the division between the US and China through an historical analysis of their ideologies It reveals the source of the extraordinary difficulty the US faces in adapting to the changes occurring in the international system inter alia the firm belief in its exceptionalism and good intentions By contrast the Chinese ideology while also possessing a remarkable internal coherence through time has achieved greater flexibility by integrating values imported from the West and several Confucian values to form a new ideology better able to adapt its public policies to changes in the national and the international environments China's significant military and economic advances are addressed along with its new investments and One Belt One Road Initiative American Political Discourse on China Michelle Murray Yang,2017-06-14 Despite the U S and China's shared economic and political interests distrust between the nations persists How does the United States rhetorically navigate its relationship with China in the midst of continued distrust This book pursues this question by rhetorically analyzing U S news and political discourse concerning the 2008 Beijing Olympic Games the 2010 U S midterm elections the 2012 U S presidential election and the 2014 2015 Chinese cyber espionage controversy It finds that memory frames of China as the yellow peril and the red menace have combined to construct China as a threatening red peril Red peril characterizations revive and revise yellow peril tropes of China as a moral political economic and military threat by imbuing them with anti communist ideology Tracing the origins functions and implications of the red peril this study illustrates how historical representations of the Chinese threat continue to limit understanding of U S Sino relations by keeping the nations relationship mired in the past **World Leadership In The Balance: China And The Us Clash For Supremacy** Pierre-antoine Donnet,2021-05-19 China and the United States have entered a multifaceted cold war trade high tech space defense environment and values as they jostle for influence throughout the world This rivalry between the world's top two

economic powers will likely dominate the decades to come and its outcome is uncertain After the American century this new century may indeed be China's or it may not With Joe Biden's election as president of the United States we are certainly in for a change of leadership style But in terms of substance US policy towards China is likely to remain tough How will Beijing react What strengths and weaknesses does China have in this long struggle for supremacy against the United States This book analyzes the different aspects of this disconcerting rivalry that has had and will continue to have an impact on our daily lives The coronavirus pandemic has further exposed the failings of a monolithic Chinese system that does not tolerate freedom of expression but it has also paradoxically placed China in a position of strength against the United States **The**

Future of China's Past Albert Welter, 2023-01-01 The Future of China's Past examines how China's traditional culture is being reinvented and manipulated for political purposes Like no time before in its recent history and certainly at no time in the history of the People's Republic China is being shaped in terms of its past but which past Confucianism Legalism Daoism Buddhism or combination of pasts is being held up as the model Given its growing economic political and cultural significance it is incumbent upon us to take China's rise seriously yet perspectives involving modern and contemporary geopolitical and intrastate dynamics are insufficient on their own for understanding China's rise and the same holds true for economic analyses however pertinent Instead this book looks at current engagements with models of China's past

introducing the four traditional lenses of Chinese thought and reflecting on their potential relevance for China's and the world's future *The Impact of China's Belt and Road Initiative* Jeremy Garlick, 2019-11-15 This book merges macro and micro level analysis of the Belt and Road Initiative BRI to dissect China's aim in creating an integrated Eurasian continent through this single mega project BRI has been the source of much interest and confusion as established frameworks of analysis seek to understand China's intentions behind the policy China's international activity in the early 21st century has not yet been successfully theorised by IR scholars because of a failure to satisfactorily encompass its complexity In addition the mix and match syncretism of the Chinese approach to foreign policy has been under emphasised or omitted in many analyses Bringing together complexity thinking and analytic eclecticism to assess the degree to which this scheme can transform international relations Garlick critically examines this large scale interconnectivity project and its potential impacts The book will be of interest to scholars and practitioners in the field of international relations and China studies including academics policy makers and diplomats around the world The US Navy and the South China Sea Bruce A

the US government used its relations with Vietnam to exert diplomatic economic and military pressure on China to open negotiations leading to full recognition and further discusses the surprising action of the US Navy in 1974 to allow the Chinese Navy to take the Paracel Islands by force thereby denying control over these islands to a united Vietnam closely allied with the Soviet Union which was the common enemy of both China and the USA Overall the book demonstrates how the presence of the US Navy in the South China Sea is a crucial element in much wider global US strategy

US-China Naval Co-operation Against the Soviet Union Bruce A. Elleman, 2025-07-25 This book discusses the key role of the transfer of naval technology from the U S to China in building up the Chinese Navy during the Cold War Revealing how this process began in the late 1970s under the Carter Administration when Deng Xiaoping was newly in power and how it accelerated under both the Reagan and Bush administrations moving from the transfer of simple technology to entire naval systems the book highlights

how the policy was successful in helping make China a serious threat to the Soviet Union and how it thereby contributed to the collapse of the Soviet Union and the end of the Cold War The book also demonstrates how this same policy also enabled China now with the world's largest navy to become much more assertive in East Asia more widely resulting in the US reversing its technology transfer policy following the Tiananmen Square massacre and in China turning to Russia and other former Soviet countries including Ukraine for the supply of Soviet era equipment Utilising disclosed and formerly secret documents this book will be a valuable resource to both students and scholars of international relations security studies and naval studies particularly in relation to Chinese U S USSR relations during the Cold War

US Foreign Policy in a Challenging World Marco Clementi, Matteo Dian, Barbara Pisciotta, 2017-07-18 This book examines how the US is dealing with the challenge of reconciling its global interests with regional dynamics and how it is able to produce and sustain order at the system level and within regional subsystems The book comprises four parts the first of which addresses global issues such as nonproliferation trade and freedom of the seas US policies in these areas are carefully analyzed considering whether and how they have been differently implemented at the regional level The remaining parts of the book focus on the US posture toward specific regions Europe the Middle East and East Asia The policies adopted by the US to confront the most relevant challenges in each region are identified and the ways in which policies in a specific region influence or are influenced by challenges in another region are explored The book is a rich source of knowledge on the nature of the balance that the US has pursued between global and regional interests It will be of much interest to scholars to practitioners to postgraduate PhD students of international relations theory and American foreign policy and to all with an interest in the ability of the US to produce international order

China-us Trade Frictions Shaping New Equilibriums With The Eu And The Us: Towards A New Multilateralism Or Tripolarism Xugang Yu, Mario Tettamanti, Cristiano Rizzi, 2021-01-05 This book shows the impact of the recent trade tensions between China and the US on the world trade order and how parties have reached a deal so called phase one January 2020 which could lead to a more comprehensive agreement and the consequences of these adjustments in shaping new equilibriums After 40 years China has transformed into an economic superpower which could now rival the US This has evoked some concerns and put the US in an uncomfortable position as the US views the rise of China as a threat to its predominance and interests However China's development and its increasing economic power which is a direct consequence of the ongoing reform process is unstoppable The confrontation between China and the US will favor Chinese expansion into the EU not only because the EU offers a more receptive environment for Chinese Foreign Direct Investment but also because the EU and China have more in common if we consider the Belt And Road Initiative and the new bilateral investment agreement which is under negotiation The EU not only represents the final destination of the BRI but also a more logical and convenient trade partner for China The shift of Chinese attention toward the EU will also change the equilibrium between China the EU and the US bring forth the negotiation of new trade agreements and move the entire

international community towards a new world trade order and a new multilateralism which might evolve into a tripolarism
