The BRC Global Standard for Food Safety Ron Kill, 2011-08-24 This book offers companies in the

food industry the first comprehensive guide to preparing for the Global Standard Audit Beverage and Food World May 2009
BASED ON ISSUE 5 OF THE BRC STANDARD The British Retail Consortium Global Standard for Food Safety was originally conceived to meet an increasing demand for a unified standard to be used by the major retailers in the UK for their suppliers of own label food products The system has proved so successful that it is now used throughout the food industry and over 7000 food manufacturers worldwide already have the Standard Companies are often unsure about how to approach attaining certification often a demanding process especially at the first attempt Not only are there over 300 clauses to satisfy there are also general concerns such as how to correct non conformities within very specific deadlines Even when their operations are actually quite satisfactory many suppliers find themselves poorly prepared for the audit and do not perform as well as they might This book offers companies in the food industry the first comprehensive guide to preparing for the Global Standard audit Using over 600 real life examples it enables manufacturers to ensure that the correct systems are in place to achieve the Standard and present themselves in the best way during the audit process It also recommends the steps to take following the audit and how to correct non conformities The book is an essential resource for suppliers wishing to attain certification for the first time and those already in the scheme seeking to improve their grades It is also of interest to certification bodies and consultants to the food industry

The Microbiology of Safe Food Stephen J. Forsythe, 2011-08-24 Food production is an increasingly complex and global enterprise and public awareness of poisoning outbreaks is higher than ever This makes it vital that companies in the food chain maintain scrupulous standards of hygiene and are able to assure customers of the safety of their products This book reviews the production of food and the level of microorganisms that humans ingest covering both food pathogens and food spoilage organisms The comprehensive contents include the dominant foodborne microorganisms the means of their detection microbiological criteria and sampling plans the setting of microbial limits for end product testing predictive microbiology the role of HACCP the setting of Food Safety Objectives relevant international regulations and legislation This updated and expanded second edition contains much important new information on emerging microbiological issues of concern in food safety including microbiological risk assessment bacterial genomics and bioinformatics detergents and disinfectants and the importance of hygiene practice personnel The book is essential reading for all those studying food science technology and food microbiology It is also a valuable resource for government and food company regulatory personnel quality control officers public health inspectors environmental health officers food scientists technologists and microbiologists Web based sources of information and other supporting materials for this book can be found at www.wiley.com/go/forsythe

Food Biodeterioration and Preservation Gary S. Tucker, 2008-04-30
Biodeterioration can be defined as the breakdown of food by agents of microbiological origin either directly or from products of their metabolism Microbiological sources can be present in foods prior to packaging or on the surfaces of packaging materials The shelf life and safety of the food will depend on the type and quantity of microorganism as well as the hurdles to

their growth offered by various preservation techniques This book discusses how the agents of food biodeterioration operate and examines the commercially used industrial methods available to control them allowing the production of safe and wholesome foods There is an emphasis on the equipment employed to carry out the various methods of preservation The introductory chapter describes in detail the microorganisms and mechanisms of food breakdown intrinsic to various key food types dairy meat and fish fruit and vegetables Direct microorganism action will be covered in addition to enzymatic breakdown The second chapter addresses HACCP including food safety legislation Subsequent chapters outline the principal commercially used methods of preserving foods These chapters follow a common structure theoretical background flow sheets of operations food preparation processing equipment special features of hygiene packaging shelf life and product safety Food Biodeterioration and Preservation is directed at food scientists and technologists in industry and academia Since it covers all the commonly used methods of food preservation it will be relevant across the entire food manufacturing industry

Seafood Processing Vazhiyil Venugopal, 2005-11-01 With global fish production falling behind demand the aquaculture of selected species has become an effective method to augment fish availability Unlike natural species however cultured fish have limited consumer appeal Value addition techniques can not only help satisfy the rising consumer demand for processed fishery products but also enhance

Global Supply Chains, Standards and the Poor Johan F. M. Swinnen, 2007 This book looks at the restructuring of the agri food industry and the rise of global retail chains in developing and transition countries focusing on the implications of these changes for the poor Part I chapters 2-7 i identifies global changes in food standards and supply chains ii explains their emergence and relevance for today's trade and development debate and iii presents a series of conceptual frameworks necessary to understand the changes and their effects Part II chapters 8-18 contains a set of empirical studies organized by region which present new quantitative information on the effects of globalization and vertical contracting in modern supply chains in developing emerging and transition countries Part III chapters 19-22 discusses the implications of these developments for the international policy agenda The book has a subject index

Standards and Agro-food Exports from Developing Countries Steven Jaffee, Spencer Henson, 2004

Global Agricultural Trade and Developing Countries M. Ataman Aksoy, John C. Beghin, 2004-11-01 Global Agricultural Trade and Developing Countries presents research findings based on a series of commodity studies of significant economic importance to developing countries The book sets the stage with background chapters and investigations of cross cutting issues It then describes trade and domestic policy regimes affecting agricultural and food markets and assesses the resulting patterns of production and trade The book continues with an analysis of product standards and costs of compliance and their effects on agricultural and food trade The book also investigates the impact of preferences given to selected countries and their effectiveness then reviews the evidence on the attempts to decouple agricultural support from agricultural output The last background chapter explores the robustness of the global gains of multilateral agricultural and food trade liberalization

Given this context the book presents detailed commodity studies for coffee cotton dairy fruits and vegetables groundnuts rice seafood products sugar and wheat These markets feature distorted policy regimes among industrial or middle income countries The studies analyze current policy regimes in key producing and consuming countries document the magnitude of these distortions and estimate the distributional impacts winners and losers of trade and domestic policy reforms By bringing the key issues and findings together in one place Global Agricultural Trade and Developing Countries aids policy makers and researchers both in their approach to global negotiations and in evaluating their domestic policies on agriculture The book also complements the recently published Agriculture and the WTO which focuses primarily on the agricultural issues within the context of the WTO negotiations
