Food Webs S. Pimm,2011-11-15 Often the meanings of words are changed subtly for interesting reasons The implication of the word community has changed from including all the organisms in an area to only those species at a particular trophic level and often a taxonomically restricted group for example bird community If this observation is correct its probable cause is the dramatic growth in our knowledge of the ecological patterns along trophic levels I call these horizontal patterns and the processes that generate them This book deals with vertical patterns those across trophic levels and tries to compensate for their relative neglect In cataloging a dozen vertical patterns I hope to convince the reader that

species interactions across trophic levels are as patterned as those along trophic levels and demand explanations equally forcefully But this is not the only objective A limited number of processes shape the patterns of species interaction to demonstrate their existence is an essential step in understanding why ecosystems are the way they are To achieve these aims I must resort to both mathematical techniques to develop theories and statistical techniques to decide between rival hypotheses The level of mathematics is likely to offend nearly everyone Some will find any mathematics too much while others will consider the material to be old familiar ground and probably explained with a poor regard for rigour and generality

Food Webs Leon Gray,2017 *Food Chains and Webs* Solway,2007-08-01 Discusses The Food Chain And How It Includes A Description Of Terms Like Energy Producers Consumers Decomposers And How It All Fits Together **Who Eats What?** Patricia Lauber,1995 Explains the concept of a food chain and how plants animals and humans are ecologically linked **Hidden Food Webs** Christina Wilsdon,2008
