

## Cystic Fibrosis

### I. Background and History of Cystic Fibrosis Research

Cystic Fibrosis is a disease caused by genetic mutations, affecting more than 300 million people worldwide, that causes a buildup of mucus in the alveoli of the lungs (CF Foundation). This disease is so detrimental because viscous mucus coats the alveoli, severely obstructing breathing and preventing the exchange of oxygen and carbon dioxide in the lungs at times. Figure 1, obtained from the Mayo Clinic, shows the difference between the alveoli of an uninfected person versus someone who suffers from Cystic Fibrosis (Figure 1). Cystic Fibrosis, abbreviated CF, is usually diagnosed in patients under two years of age, because the lifespan of someone with CF is only about forty years (CF Foundation). The symptoms for CF include persistent coughing episodes, shortness of breath, buildup of phlegm, salty tasting skin, poor weight gain, male infertility, and frequent *Staphylococcus aureus*, *Haemophilus influenzae*, and *Pseudomonas aeruginosa* infections, (CF Foundation). These infections occur so frequently because the warm, viscous mucus forms a sustainable environment for bacterial colonies to grow. Amoxicillin or Erythromycin can cure the bacterial infections, but there is no known genetic cure for CF.

Cystic Fibrosis was originally thought to be caused by bacterial infections alone, until the CF gene was discovered on human chromosome seven in 1989 (CF Foundation). Early research led to the

*Report of the Ross Pediatric Research Conference*, 1954      *In the Shadow of Illness* Myra Bluebond-Langner, 2020-06-30

A revealing account of how families adapt to living with a chronically ill child What is it like to live with a child who has a chronic life threatening disease What impact does the illness have on well siblings in the family Myra Bluebond Langner suggests that understanding the impact of the illness lies not in identifying deficiencies in the lives of those affected but in appreciating how family members carry on with their lives in the face of the disease s intrusion *The Private Worlds of Dying Children* Bluebond Langner s previous book now considered a classic in the field explored the world of terminally ill children In her new book she turns her attention to the lives of those who live in the shadow of chronic illness the parents and well siblings of children who have cystic fibrosis Through a series of narrative portraits she draws us into the daily lives of nine families of children at different points in the natural history of the illness from diagnosis through the terminal phase In these portraits as family members talk about their experiences in their own words we see how parents well siblings and the ill children themselves struggle in different ways to contain the intrusion of the disease into their lives Bluebond Langner looks at how parents adjust their priorities and their idea of what constitutes a normal life how they try to balance the needs of other family members while caring for the ill child and how they see the future This context helps us understand how well siblings view the illness and how they relate to their ill sibling and parents Since the issues raised are not unique to cystic fibrosis but are common to other chronic and life threatening illnesses this book will be of interest to all who study care for or live with the seriously ill      **The Courage to Inquire** Thomas Ehrlich, 1995 *The Courage to Inquire* is an informed behind the scenes look at American higher education Thomas Ehrlich former President of Indiana University brilliantly delineates and analyzes all of the key issues currently debated in higher education the role of research versus teaching the importance of research for its own sake the qualities that make a good teacher and the necessity for professors to serve their communities What are the ingredients of great teaching What do undergraduates need to learn Can college teach values Why is research not a dirty word Are teaching and research at odds How do universities help economic growth Does it make sense to integrate community service into the curriculum These are some of the questions that Ehrlich confronts based on his experience at Indiana University He also deals with the most troublesome and in some cases controversial issues challenging universities the complexities of planning in today s complicated world tenure the challenge of educating the new majority non traditional students how to enhance minority presence on predominately white campuses how to combat bigotry the necessity of resisting political correctness and the difficulties of keeping athletics within bounds an issue that received considerable publicity in Ehrlich s first year at Indiana He ends with an eloquent statement regarding the importance of a university education instilling the courage to inquire and the morality of reason      Current Catalog National Library of Medicine (U.S.), 1993 First multi year cumulation covers six years 1965 70      Biennial Report of the Director, National
