Elephants Ellen Greene Stewart, 2022-03-18 Elephants are a keystone species and have been a part of the magic of the thickly forested land of South Africa for millennia This book focuses on the history and work of Knysna Elephant Park a leading South African elephant research facility that has been home to more than 40 elephants in 25 years Unfortunately all the mystique of the Knysna elephant has been reduced to a single elephant left alive Exploring a wide range of topics this book covers the impact of elephants interactions with tourists how they recover from trauma and even their relevance in human healthcare Renowned elephant researchers explain the majesty of the elephant brain which has the largest temporal lobe devoted to communication language spatial memory and cognition To this effect the book emphasizes the threat of poaching to these gentle giants which has almost forced them to extinction Perhaps if humans pay attention to how elephants symbolize our relationship with nature we can learn important lessons about humanity itself Death and Compassion Dan Wylie, 2018-10-01 Traces the literary history of the elephant and its role

in South Africa's cultural imaginary Elephants are in dire straits again They were virtually extirpated from much of Africa by European hunters in the eighteenth and nineteenth centuries but their numbers resurged for a while in the heyday of late colonial conservation efforts in the twentieth Now according to one estimate an elephant is being killed every 15 minutes This is at the same time that the reasons for being especially compassionate and protective towards elephants are now so well known that they have become almost a cliché their high intelligence rich emotional lives including a capacity for mourning caring matriarchal societal structures that strangely charismatic grace Saving elephants is one of the iconic conservation struggles of our time As a society we must aspire to understand how and why people develop compassion or fail to do so and what stories we tell ourselves about animals that reveal the relationship between ourselves and animals This book is the first study to probe the primary features and possible effects of some major literary genres as they pertain to elephants south of the Zambezi over three centuries indigenous forms early European travelogues hunting accounts novels game ranger memoirs scientists accounts and poems It examines what these literatures imply about the various and diverse attitudes towards elephants about who shows compassion towards them in what ways and why It is the story of a developing contestation between death and compassion between those who kill and those who love and protect Value Full Life Elizabeth Cunningham LCSW ACSW,2019-05-01 Value Full Life is a framework of eleven core values encouraging us to come together and work toward the growth and development of possibilities and aspirations These values combine respect for oneself and one's world encompassing the development of esteem and honor for our unique individuality and all that surrounds us Value Full Life is a concise expression of philosophies for living along with core values that have been relevant to the success of the United States of America Value Full Life emphasizes a blend of natural science human history and behavior and clinical competencies that are relevant from a personal and social system perspective The author incorporates a historic legacy of wisdom from spiritual traditions Native Americans the Founding Fathers and other American leaders to define a value system that can help bring us together and secure a stronger foundation for future endeavors The United States and we as individual citizens are at an intersection with history Value Full Life takes into account the many factors that contribute to the urgency of our times including the challenges facing the world today the political divide in the United States pace and scope of change volume of exposure to information and unprecedented complexity of our modern world The values emphasized in Value Full Life are stepping stones and belief systems that can inspire healthy perspectives and life competencies **Anthrozoology** Michael Charles Tobias,Jane Gray Morrison,2016-12-20 This groundbreaking work of both theoretical and experiential thought by two leading ecological philosophers and animal liberation scientists ventures into a new frontier of applied ethical anthrozoological studies Through lean and elegant text readers will learn that human interconnections with other species and ecosystems are severely endangered precisely because we lack by our evolutionary self confidence the very coherence that is everywhere around us abundantly demonstrated What our species has deemed to

be superior is according to Tobias and Morrison the cumulative result of a tragically tenuous argument predicated on the brink of our species self destruction giving rise to a most unique proposition We either recognize the miracle of other sentient intelligence sophistication and genius or risk enshrining the shortest lived epitaph of any known vertebrate in earth's 4.1 billion years of life Tobias and Morrison draw on 45 years of research in fields ranging from ecological anthropology animal protection and comparative ethics to literature and spirituality and beyond They deploy research in animal and plant behavior biocultural heritage contexts from every continent and they bring to bear a deeply metaphysical array of perspectives that set this book apart from any other The book departs from most work in such fields as animal rights ecological aesthetics comparative ethology or traditional animal and plant behaviorist work and yet it speaks to readers with an interest in those fields A deeply provocative book of philosophical premises and hypotheses from two of the world's most influential ecological philosophers this text is likely to stir uneasiness and debate for many decades to come

Reading the Hebrew Bible with Animal Studies Ken Stone, 2023-05-25 An excellent introduction to the field of animal studies the applications of these ideas to biblical passages illuminate the text in new ways Brandon R Grafius *Horizons in Biblical Theology* Animal studies may be a recent academic development but our fascination with animals is nothing new Surviving cave paintings are of animal forms and closer to us as Ken Stone points out animals populate biblical literature from beginning to end This book explores the significance of animal studies for the interpretation of the Hebrew Bible Combined with biblical scholarship animal studies sheds useful light on animals animal symbolism and the relations among animals humans and God not only for those who study biblical literature and its ancient context but for contemporary readers concerned with environmental social and animal ethics Without the presence of domesticated and wild animals neither biblical traditions nor the religions that make use of the Bible would exist in their current forms Although parts of the Bible draw a clear line between humans and animals other passages complicate that line in multiple ways and challenge our assumptions about the roles animals play therein Engaging influential thinkers including Jacques Derrida Donna Haraway and other experts in animal and ecological studies *Reading the Hebrew Bible with Animal Studies* shows how prehumanist texts reveal unexpectedly relevant dynamics and themes for our posthumanist age Stone's ecological sensibilities theoretical acumen and incisive exegetical arguments open up fresh perspectives Stephen D Moore *The Theological School* Drew University This monograph is poised to become a key work in the field Anne L tourneau *Reading Religion* Groundbreaking Carol J Dempsey *OP Horizons*

childhood in a family of six boys his marriage to a French woman with a different orientation toward gender and decades of academic turf wars over outdated scientific theories that have proven hard to dislodge from public discourse He discusses sexual orientation gender identity and the limitations of the gender binary exceptions to which are also found in other primates With humor clarity and compassion Different seeks to broaden the conversation about human gender dynamics by promoting an inclusive model that embraces differences rather than negating them **Řeč zvířat** Meijer Eva,2019-09-23

Holandsk spisovatelka Eva Meijerov ve své knize zkoumá, proč se lidé tak těžko dohodnou na tom, jak o nich ale i o jazyce smýšlejí. Barvitě a zábavně popisuje různé formy komunikace. Stejně jako v deck anekdoty s podrobnou analýzou osobní zkušenosti s vahami o jazyku a jeho funkcích. Popisuje hlasové projevy psů, delfinů nebo slonů a zároveň se zabývá formami komunikace u mravenců nebo v el Krom objevu, že to neprobíhá tak, jak se nám mohlo zdát, přináší porozumění tomu, jak se lidé a zvířata i obecně jeho vztahu k tomu, jak se zvířata chová. Pokud máte štěstí, potkáte zvíře, které si chce mluvit. Pokud máte štěstí, potkáte zvíře, které si dopřije ten, který má chuť, aby se s vámi seznámilo. S tím, který vám zvířata lze navázat vztah, který vám může mnohdy ukázat nejednotlivé věci, které zvířata ale i o vás samotných. Jiné zvířata na své hledí z vlastní perspektivy a to se na něj dokážete dívat jejich oči, má obohacení život a naučíte se vidět ho jinak. **O último abraço da matriarca** Frans de

Waal,2021-05-25 Desafiando a ruptura humano animal e propondo a discussão de grandes questões filosóficas da atualidade o grande primatólogo Frans de Waal nos leva a uma jornada irresistível pela riqueza emocional dos animais. Neste livro comovente e original ele nos mostra que estamos muito mais conectados a nossos companheiros planetários do que jamais ousamos imaginar. Se você esperava de Mama completar 59 anos e meses antes do octagésimo aniversário de Jan van Hooff, esses dois hominídeos tiveram um reencontro comovente. Mama, a matriarca de uma colônia de chimpanzés, estava deitada em seu ninho no zoológico de Arnhem moribunda quando o velho professor de biologia tomou a decisão incomum de visitá-la para uma despedida. Embora se conhecessem de longa data, nenhum ser humano em sua consciência entraria na jaula de um chimpanzé adulto. Mas ao ver o amigo Mama despertou da letargia, reagiu com um grande sorriso e tranquilizou-o com tapinhas no pescoço. Ela parecia perceber a apreensão de Jan e dizer a ele que estava feliz com a sua presença. A vida de Mama e a cena desse último abraço são o ponto de partida para uma exploração fascinante das notáveis aptidões emocionais dos animais e do que elas podem revelar sobre nós. Neste livro surpreendente Frans de Waal nos apresenta essa e outras histórias do cotidiano lutado pela perda do amigo a elefantes que revisitam ossos de seus entes queridos para ilustrar que não somos a única espécie com a capacidade de amar, odiar, sentir medo e até mesmo culpa. Seus exemplos se dão de modo mais parecido conosco por mamíferos, aves, peixes e até mesmo moluscos como o polvo. Cativante, cheio de compaixão e insights sobre a vida dos animais, incluindo os humanos. Yuval Noah Harari **L'ultimo abbraccio** Frans de
