*Challenge of Politics, 4th Edition* Neal Riemer, Douglas W. Simon, Joseph Romance, 2013-02-15 So often political science is introduced to students as a segmented field The Challenge of Politics instead enables students to see how the subfields converge around a set of crucial questions can we as citizens and students articulate and defend a view of the good political life and its guiding political values Can we develop a science of politics to help us understand significant political phenomena the empirical realities of politics Can we bring a high level of political prudence or wisdom to bear on judgments about politics and public issues Can citizens and students creatively address the future of politics Riemer Simon and Romance aim to harmonize the valuable lessons of classic and contemporary theory as well as to reconcile politics to scientific and empirical study The book gives students an avenue to explore the impact of philosophy and ideology to recognize major forms of government to evaluate empirical findings and to understand how policy issues directly affect people's lives Throughout the authors look at political dynamics of American comparative and international affairs While continuing to pursue its distinctive normative approach and showing politics to be a potentially humanizing enterprise this new edition of Challenge has been revised and updated for major world events like the global financial crisis recent elections in the U S and elsewhere important policy decisions like the recent Supreme Court ruling in the U S on healthcare and the aftermath of the Arab Spring Based on reviewer feedback it has also been substantially streamlined throughout

Economic Knowledge in Regulation Lorna S Schrefler, 2014-12-01 It is conventional to argue that the autonomy and reputation of independent regulatory agencies IRAs depend on their expertise Yet studies on how IRAs create and deploy their knowledge capacity are few and far apart By addressing the underexplored question of the role of economics in regulatory policy making this book fills a gap in two different strands of literature on IRAs and on knowledge utilisation respectively Only a few authors have taken a somewhat comparable approach eg McGarity 1991 Morgenstern 1997 Jennings and Hall 2011 but their work focuses on US regulators Conversely little has been written on their European counterparts This book also proposes an innovative solution to operationalise hypotheses on the role of expertise in policy making and makes this contribution particularly relevant for recent debates on evidence based policy making Finally it takes a close look at specific regulatory decisions by one of the oldest and most authoritative regulators
