CASIO.

Getting Acquainted

Congratulations upon your selection of this CASIO watch. To get the most out of your purchase, be sure to read this manual carefully.

- This watch does not have a city mode that corresponds to the Greenwich Mean Time differential of -3.5 hours. Because of this, the radio-controlled atomic timekeeping function will not display the correct time for Newfoundland, Canada.

Keep the watch exposed to bright light

- The intensity generated by the solar cell of the watch is stored by a built-in battery. Leaving or using the watch when it is not exposed to light causes the battery to run down. Please turn the watch so it is exposed to light as much as possible.
- When you are not wearing the watch on your wrist, position the face so it is pointed at a source of bright light.
- You should try to keep the watch outside of your shirt as much as possible. Even if the face of the watch is exposed only partially from light, charging will be reduced significantly.

- The watch continues to operate, even when it is not exposed to light. Leaving the watch in the dark can cause the battery to run down, which will cause some watch functions to be disabled. If the battery goes dead, you will have to reconfigure watch settings after recharging. To ensure normal watch operation, be sure to keep it exposed to light as much as possible.

General Guide

Manual Receiver

Receiver Status Check

Radio-controlled Atomic Timekeeping

- This watch receives a time calibration signal and updates its time setting accordingly.
- It supports time calibration signals: Continental (Germany), England (London), United States (Fort Collins), Japan (Fukuoka or Fukuoka/Nagasaki).
- Use the information under "Signal Reception Troubleshooting" if you experience problems with time calibration signal reception.

Current Time Setting

- This watch adjusts its time setting automatically in accordance with a time calibration signal. You also can perform a manual procedure to set the time and date when necessary.
- The first thing you should do after purchasing this watch is to specify your home city, which is the city where you will normally use the watch. For more information, see "To specify your home city".
- When using the watch outside the area covered by the time calibration signal transmitters, you will have to adjust the current time setting manually as required. See "Timekeeping" for more information about manual time setting.
- The radio time calibration signal can be picked up by the watch within 100 miles (160 km) of the transmitter. The signal is received by the watch from stations in the United States, Canada, the continental United States, and Mexico.

To specify your home city

- In the Timekeeping Mode, hold down (C) for about two seconds, and then release after about two seconds.
- This indicates the watch is in the setting mode.
- Entering the setting mode will cause the stopwatch second hand to move to the city code of the currently selected home city.
- Use (D) to change the home city setting.
- Each press of (D) causes the stopwatches second hand to indicate the selected city code.
- All hands (except for the second hand), and the date display will change automatically to the appropriate settings for the currently selected city code. All watch operations are disabled while the hands and date display are changing.
- Time calibration signal reception is supported when any one of the city codes shown in the table below is selected as your home city.

- The actual date at which some functions are disabled depends on the watch model.
- Be sure to read "Power Supply" for important information you need to know when exposing the watch to bright light.

If the analog hands aren't moving...

- If the analog hands aren't moving, it means that the power saving mode has stopped them to save battery power.
- See "Power Saving" for more information.
- The function also indicates the battery level (see Levels).

About This Manual

- Button operations are indicated using the letters shown in the illustration.
- Each section of this manual provides you with the information you need in order to perform operations in each mode. Further details and technical information can be found in the "Reference" section.

Stopwatch Mode

- About 1.5 seconds after you enter the Alarm Mode or Stopwatch Mode from another mode, the watch's hands will start to move to the time setting for that mode you entered. All button operations are disabled while the hands are moving. If you receive a time calibration signal, the watch will go to the Alarm Mode or the Stopwatch Mode to get the correct time. Press (C) (mode change) to advance to the next mode before the hands start moving.

- In addition to the above, you also can select city codes that are outside the range of the time calibration signal transmitters supported by this watch.
- Select the city code that is closest to the city code that corresponds to Newfoundland.
- After the home city setting is in the way you want, press (D) to return to the Timekeeping Mode.
- When you select the city code, the watch should show the correct time as soon as you specify your home city code. If it does not, it should adjust automatically after the first date change operation. You also can perform manual time setting or you can set the time manually.
- Even if the time calibration signal is received correctly, the watch will not update the analog hands, may not indicate the correct time, if this happens, and the procedure under "Adjusting the Manual Function" to check the home position of the hands, and make adjustments as required.
- You can also change the home city setting by changing the current home city and the current world time city. For details, see "Changing your home city and world time city".

Daylight Saving Time (DST)

- Daylight Saving Time (summer time) advances the time setting by one hour from standard time. It is observed in many countries or states. Please refer to Daylight Saving Time.
- The time calibration signal transmitters from Mountain (Germany), Berlin (Germany), or Fort Collins (the United States) include both standard time and DST data, while the Auto DST setting is turned on, the watch switches between standard time and DST operation (only automatically in accordance with the signal).
- Though the time calibration signal transmitted by the Fukuoka and Fukuoka/Nagasaki Japan transmitters include summer time data, summer time currently is not supported by this watch.
- The watch DST setting is Auto (DST) (AUTO), whenever you select LON, PAR, AM, SAN, LAS, DEN, CMC, NYC, or TYO as your home city code.
- If you receive a time calibration signal in your area, it is probably in time to switch between standard time and Daylight Saving Time (summer time) manually. For more information, see "To set the time and date manually".
