

# Operation Guide 4765

CASIO

## Getting Acquainted

Congratulations upon your selection of this CASIO watch. To get the most out of your purchase, be sure to read this manual carefully.

### Keep the watch exposed to bright light

#### Bright Light

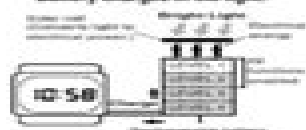

The conductivity generated by the solar cell of this watch is stored by a built-in battery. Leaving or using the watch when it is not exposed to light causes this battery to run down. **Make sure the watch is exposed to light as much as possible.**

- When you are not wearing the watch on your wrist, position the face so it is pointed at a source of bright light.
- You should try to keep the watch outside of your pocket as much as possible. Charging is reduced significantly if the face is only partially obscured.

- The watch continues to operate, even when it is not exposed to light. Leaving the watch in the dark can cause the battery to run down, which will result in some watch functions to be disabled. If the battery gets dead, you will need to reconfigure watch settings after recharging. To ensure normal watch operation, be sure to keep it exposed to light as much as possible.

#### Battery charges in the light.

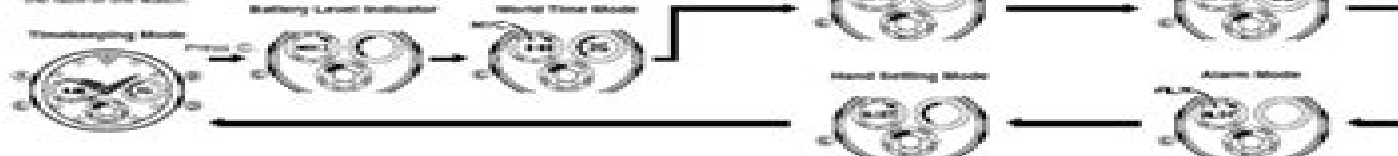

#### Battery discharges in the dark.

## General Guide

- Press (D) to change from mode to mode.
- In any mode (except when a setting screen is on the display), press (D) to illuminate the face of the watch.

## Radio-controlled Atomic Timekeeping

This watch receives a time calibration signal and updates its time setting automatically.

- Supports time calibration signals: Germany (Munich), England (Paddy), United States (Port Collins), Japan.

### Current Time Setting

This watch adjusts its time setting automatically in accordance with a time calibration signal. You can also perform a manual procedure to set the time and date, when necessary.

- The first thing you should do after purchasing this watch is to specify your Home City (the city where you normally will use the watch). For more information, see "To specify your Home City".

- When using the watch outside the areas covered by the time signal transmitters, you will have to adjust the current time setting manually as required. See "Timekeeping".
- For more information about time settings.
- The U.S. time calibration signal can be picked up by the watch when in North America. The time "North America" in this manual refers to the area that consists of Canada, the continental United States, and Alaska.
- The atomic time of this watch is synchronized with the digital time. Because of this, the atomic time setting is automatically adjusted whenever you change the digital setting. (See "Changing Timekeeping" for more information.)

### To specify your Home City

- In the Timekeeping Mode, hold down (D) the city code screen.
  - Press (D) to select the city code you want to use as your Home City.
- Time calibration signal reception is supported when any one of the city codes shown in the table below is selected as your Home City.

North America Signal		Japan Signal		U.S. Signal	
City Code	City Name	City Code	City Name	City Code	City Name
01	Alaska	01	Osaka	01	Alaska
02	Canada	02	Yokohama	02	Canada
03	Germany	03	Kobe	03	Germany
04	England	04	Kyoto	04	England
05	United States	05	Nagoya	05	United States
06	Port Collins	06	Saitama	06	Port Collins
07	Munich	07	Sendai	07	Munich
08	Japan	08	Utsunomiya	08	Japan
09	Germany	09	Maebashi	09	Germany
10	England	10	Utsunomiya	10	England
11	United States	11	Maebashi	11	United States
12	Port Collins	12	Maebashi	12	Port Collins
13	Munich	13	Maebashi	13	Munich
14	Japan	14	Maebashi	14	Japan
15	Germany	15	Maebashi	15	Germany
16	England	16	Maebashi	16	England
17	United States	17	Maebashi	17	United States
18	Port Collins	18	Maebashi	18	Port Collins
19	Munich	19	Maebashi	19	Munich
20	Japan	20	Maebashi	20	Japan

- Press (D) to exit the setting screen.

- The actual level at which some functions are disabled depends on the watch model.
- Proper display illumination can run down the battery quickly and require recharging. The following guidelines give an idea of the charging time required to restore from a very low-power situation.
- Approximately 20 minutes exposure to bright sunlight coming in through a window.
- Approximately 30 minutes exposure to indoor fluorescent lighting.
- Be sure to read "Power Supply" for important information you need to know when recharging the watch for bright light.

### If the display of the watch is blank...

- If the display of the watch is blank, it means that the watch's Power Saving function has turned off the display to conserve power.
- See "Power Saving Function" for more information.

### About This Manual

- Depending on the model of your watch, display the numbers either as dark figures on a light background, or light figures on a dark background. All examples shown in this manual are shown using dark figures on a light background.
- Specific operations are indicated using the letters shown in the illustration.
- Most of the display examples in this manual show only the digital display without the analog hands.
- Each section of this manual provides you with the information you need to perform operations in each mode, function, and feature. Information can be found in the "Reference" section.

### Important!

- Normally, your watch should show the correct time as soon as you select your Home City code. If it does not, it should adjust automatically after the next auto-receive operation. On the screen at the right, you can also perform manual receipt of you can set the time manually.
- The watch will receive the time calibration signal automatically from the appropriate transmitter on the screen at the right, and update its settings accordingly. For information about the relationship between city codes and transmitters, see "Home City Codes and Transmitters".
- London factory default settings: Auto-receive is turned off for all of the following city codes: **001** (Alaska), **002** (Canada), **003** (Germany), **004** (England), and **005** (United States). For details about turning on auto-receive for these city codes, see "To turn auto-receive on and off".
- You can disable time signal reception. If you want, see "To turn auto-receive on and off" for more information.
- Read the chapter under "Reception Ranges" for information about the reception ranges of the watch.
- If you are in an area that does not use Daylight Saving Time (year-round), turn off the DST setting.

### Time Calibration Signal Reception

There are two different methods you can use to receive the time calibration signal: auto-receive and manual receive.

#### Auto-Receive

With auto-receive, the watch receives the time calibration signal automatically up to six times a day. When any auto-receive is successful, the following auto-receive operations are not performed. For more information, see "About Auto-Receive".

#### Manual Receive

Manual receive means you start a time calibration receive operation with the press of a button. For more information, see "To perform manual receive".

### Important!

- When getting ready to receive the time calibration signal, position the watch as shown in the nearby illustration, with the LCD window side facing towards a window. Make sure there are no metal objects nearby.

- Make sure the watch is facing the right way.
