Heterogeneous Wireless Access Networks Ekram Hossain, 2008-09-18 Heterogeneous wireless networking, which is sometimes referred to as the fourth generation 4G wireless, is a new frontier in the future wireless communications technology, and there has been a growing interest on this topic among researchers and engineers in both academia and industry. This book will include a set of research and survey articles featuring the recent advances in theory and applications of heterogeneous wireless networking technology for the next generation, e.g., fourth generation wireless communications systems. With the rapid growth in the number of wireless applications, services, and devices using a single wireless technology such as a second generation 2G and third generation 3G wireless system would not be efficient to deliver high speed data rate and quality of service (QoS) support to mobile users in a seamless way. Fourth generation 4G wireless systems are devised with the vision of heterogeneity in which a mobile user device will be able to connect to multiple wireless networks, e.g., WLAN, cellular, WMAN simultaneously. This book intends to provide a unified view on the state of the art of protocols and architectures for heterogeneous wireless networking. The contributed articles will cover both the theoretical concepts and system level implementation issues related to design, analysis, and optimization of architectures and protocols for heterogeneous wireless access networks.

Introduction to Research in Leadership David M. Rosch, Lori E. Kniffin, Kathy L. Guthrie, 2023-06-01 Introduction to Research in Leadership examines the process and skills required for effectively conducting research on the concept of leadership. Its authors employ a microscope for close analysis and build balconies to see trends and gain perspective. Designed to be imminently practical, it employs concrete examples of fictional graduate students, faculty, and professionals struggling with their own issues to help readers make sense of the world of research and all of its complexities. Filled with personal anecdotes, stories, and even a touch of humor and sarcasm, each chapter weaves in relevant concepts so that those beginning the process of producing scholarship can get started on a productive path and with a positive attitude. This introductory textbook reviews the core philosophies employed in creating new knowledge within a field of research. It describes quantitative, qualitative, and mixed methods as well as several concepts that are common across these. The text concludes with chapters focused on critical scholarship in leadership and creating habits that lead to a lifetime of learning.

Vargo, 2014-12-18 Expanding on the editors award winning article *Evolving to a New Dominant Logic for Marketing* this book presents a challenging new paradigm for the marketing discipline This new paradigm is service oriented customer oriented relationship focused and knowledge based and places marketing once viewed as a support function central to overall business strategy Service dominant logic defines service as the application of competencies for the benefit of another entity and sees mutual service provision rather than the exchange of goods as the proper subject of marketing It moves the orientation of marketing from a market to philosophy where customers are promoted to targeted and captured to a market with philosophy where the customer and supply chain partners are collaborators in the entire marketing process The editors elaborate on this model through an historical analysis clarification and extension of service dominant logic and distinguished marketing thinkers then provide further insight and commentary The result is a more comprehensive and inclusive marketing theory that will challenge both current thinking and marketing practice
