The Islamic Council of Norway and the Challenge of Representing Islam in Europe Olav Elgvin,2025-07-24 Governments all across Europe have attempted to govern the Muslim population by working with representative Muslim councils These councils however have often been plagued by conflicts and splits Why This book is the first attempt to answer this question in full It does so by zooming in on the history of The Islamic Council of Norway For many years this organization functioned well But after a prolonged conflict the organization split in two in 2017 Based on a thorough study of the organization the author claims that pressure from society at large has made it more difficult for such organizations to fulfil their role as Muslim representatives

Reconciliation in Northern Nigeria Olayinka Oluniyi,2017-09-08 In this book Dr Olufemi Oluniyi takes a fresh look at Muslim Christian violence which has become synonymous with the name of Northern Nigeria It is fresh in the sense that he takes a historical approach to the problem dating back to the founding of Northern Nigeria This approach inevitably brings to the fore the culpability of the colonial government for the institutionalisation of inequality and for pursuing policies which are tantamount to planting the seeds of religious violence for post independence fruitage and harvest By highlighting the role of the colonial administration he is by no means suggesting that post independence perpetrators of violence are less culpable for their crimes against humanity Rather the highlight is meant to

In Pursuit of Wisdom Phillip Campbell III, 2024-06-21. The relationship between the Catholic Church and science is one of the most misunderstood stories of Western civilization. Merely repeating the mantra that there is no ultimate contradiction between faith and reason has not solved the crisis for millions of Catholics, many of whom have abandoned the Faith over perceived discrepancies between the religious and scientific world. **In Pursuit of Wisdom** moves beyond polemical and surface-level approaches to glean a more accurate picture of the historical relationship between scientific inquiry and the Catholic Faith. Beginning with the earliest days of the Church, proceeding through the Middle Ages, Renaissance, and beyond Catholic history, author Phillip Campbell tells the stories of brilliant individuals challenging controversies and awe-inspiring discoveries that form the tapestry of the Church's rich engagement with science. When we understand people and perspectives of the past, we can better understand how we arrived at our current situation and be prepared to respond to the questions of those both within and outside the Church who believe that faith and reason are incompatible. *The Report: Saudi Arabia 2015* Oxford Business Group, 2015-09-22. While Saudi Arabia's economy remains dominated by its hydrocarbons sector, several other sectors have emerged in recent years as key propellers of economic growth. The Kingdom's financial services industries have continued to expand steadily despite the liquidity challenges posed by falling oil prices. Trade and

investment are being treated as key priorities as the government looks to negotiate this altered economic landscape aiming to leverage its large population high per capita income and many sea and air links The country s capital markets sector meanwhile is poised for a period of significant growth on the back of the opening of Tadawul to international investors in 2015 and the raft of regulatory upgrades implemented as result The domestic insurance industry which remains dominated by the motor and medical segments has enjoyed double digit growth over the past five years in both revenue and net profit Elsewhere the targets outlined in Vision 2030 indicate that a period of greater opportunity and integration is on the horizon for private players operating in core sectors such as health care utilities industry and ICT **The New York Times**
