Asteroid Answers to Ancient Calendar Mysteries Herbert B. Stollorz,2008-07-03 Ancient calendars found around the world are designed to end one point in time They communicate an urgent warning to everyone alive today Complex bronze and gold clocks with multiple dials are found in museums around the world Why they have such advanced intricacy has stumped scientists for hundreds of years This book reveals why the ancients built so many pyramids observatories as well as those complex gold and bronze clocks with more than one dial It surprised me greatly to discover that their various complex designs in one way or another converge on 21 December 2012 It amazes me that ancient cultures separated by thousands of miles of geography and thousands of years in chronology agree so precisely in the cyclical nature of time history and prophecy which is history written in advance The most famous example is the Mayan Aztec calendar which ends its 25 626 year cycle on that momentous date Some researchers have also found 21 December 2012 in what is called the Bible Code Using very different

research methods I discovered it in the Bible's book of Revelation and Daniel's prophecies. It is one of the most important dates in the plan of God for all humanity. *Time in Diaries of Court and Bakufu Officials in the late 13th Century* Alexandra Ciorciaro, 2024-11-04 Human existence is fundamentally defined by time. Throughout history and across cultures, societies have negotiated time in various ways. This monograph studies temporality as it emerges from diaries produced by government officials during the late thirteenth century in Japan, thereby contributing a perspective gleaned from non-literary texts to the study of time in the social sphere of noble elites in the Kamakura period. In synthesising different approaches to the study of time, it analyses various aspects of time to obtain a comprehensive picture of how time is expressed in these diaries, scrutinises the time practices that they disclose and reflect on related conceptualisations and evaluations of time. The monograph argues that we may discern a plurality of coexisting modes of time and that certain aspects and concerns took precedence over others in different situations depending on the symbolic forms that dominated them. As part of the Time in Medieval Japan (TIMEJ) research project of the University of Zurich, this research aims to contribute to a more nuanced understanding of medieval Japan as a multi-faceted society with diverse approaches to time. *A Handbook of the Aramaic Scrolls from the Qumran Caves* Daniel Machiela, 2022-12-05 This book provides the first comprehensive treatment of the Aramaic Dead Sea Scrolls from the caves of Qumran. These nearly one hundred scrolls open a window onto a vibrant period of Jewish history for which we previously had few historical sources. Scholars and advanced students will find a general introduction to the corpus, detailed richly illustrated profiles of individual scrolls, and up-to-date studies of their Aramaic language and scribal practices. The goal of the book is to foster and support further study of these scrolls against the historical backdrop of early Judaism and ancient Mediterranean scribal cultures. **Swimming in Your Brain** Elle A.
