California Psychiatric Technician Licensure Examination Study Guide:

California Occupational Guide, *Resources in Education*, 1997 **Greater Los Angeles Public Service Guide to City-county-state and Federal Offices** Barbara Rosien, 1977 **1,000+ Practice Questions with Rationales for Psychiatric Technician Licensure Examination** Solomon Barroa, 2017-07-05

The path to becoming a Psychiatric Technician is not easy. It requires completion of courses, clinical exposure, and passing the licensure examination. The completion of courses must be from an approved or accredited Psychiatric Technician program. Courses include 396 hours of education in nursing science, 54 hours in pharmacology, 378 in mental disorders, 378 in developmental disabilities, and 324 hours for other courses such as anatomy, physiology, nutrition, leadership, and management. The above requirements encompass classroom theory and supervised clinical exposure. This book contains 1,096 practice questions with rationales, broadly and explicitly covering nursing science, gerontological nursing, basic anatomy and physiology, pharmacology, basic nutrition and dietetics, medical terminologies, mental health, including theories of personality, defense mechanisms, psychosocial tasks, developmental disabilities, anxiety disorders, affective disorders, organic brain syndromes, mood disorders, personality disorders, eating disorders, substance abuse disorders, schizophrenia, sexual issues, psychopharmacology, psychotherapy, therapeutic techniques of communication, and other important topics. It is not intended to reflect the exact questions of the Board examination. The author's intention is to provide effective review material for the reader. Various levels of difficulty are reflected in this book. There are easy and difficult questions.
