Designing Ogden, the Life and Work of Leslie Hodgson Brandon Toponce,2016-05-27 No other high school in the state of Utah has more elegance and beauty than that of Ogden High School Lou Homer Leslie's daughter stated The quality of the building will endure long after the cost is forgotten In addition she also commented that the building has caught the rhythm of the Rockies with its art deco peaks rising into the sky **Courts, Pluralism and Law in the Everyday** Cinzia Piciocchi,2023-08-11 This book examines the everyday judicial experience in four multicultural jurisdictions as a means of exploring the relationship between legal systems and cultural identities Increasing social heterogeneity has deeply affected

legal systems as courts and parliaments must now deal with a growing rate of cases concerning cultural pluralism. Headline grabbing disputes usually concern challenges to fundamental rights and principles which may be put at risk by some religious or cultural practices. These are difficult issues questioning the compatibility between some cultural and religious practices and constitutional values. However, much of the interaction between law and cultural pluralism also concerns daily life activities which do not necessarily challenge fundamental rights. This book deals with food, clothing and days of rest, three expressions of both human needs and identity which are based on ethnic origin, tradition, culture, religion or simply taste. The volume looks at the intersection between these choices and constitutional rights such as religious liberty or freedom of expression. It aims to understand how the state legal system deals with them and when non-mainstreaming behaviours are accommodated. Four legal systems are taken into consideration: the United States of America, Canada, France and Italy, exploring similarities and differences in facing cultural diversity around these quotidian issues. The book pays particular attention to the places where diversity is most apparent and also considers the choices that are not based on religious precepts but rather on personal philosophy. The book will be of interest to researchers, academics and policy makers working in the areas of constitutional law, law and cultural diversity, human rights, minority rights and discrimination law.

Empowerment Kenneth McLaughlin, 2016-01-08. Empowerment is a term in widespread use today and one that is often considered to be a self-evident good. Here McLaughlin explores its emergence in the 1960s through to its rise in the 1990s and ubiquity in present-day discourse and interrogates its social status, paying particular attention to social policy, social work and health and social care discourse. He argues that a focus on empowerment has superseded the notion of political subjects exercising power autonomously. This innovative volume discusses the relationship between concepts of empowerment and power as they have been understood historically. Analyses changes in the conception and meaning of empowerment in relation to the shifting social and political landscape. Acknowledges the positive impact empowerment strategies have had on those who have campaigned to be empowered and also on those who have seen their role as being to help empower others. Highlights ways in

which talk about empowerment can actually work in such a way as to further disempower those already marginalised. Critically examining how empowerment has become embedded in contemporary social and political life, this work offers a discussion of the term's multiple meanings, what it actually entails, and how it constructs and positions those being empowered and those empowering.

Colonial Legacies And Contemporary Studies Of China And Chineseness: Unlearning Binaries, Strategizing Self Chih-yu Shih, Prapin Manomaivibool, Mariko Tanigaki, Swaran Singh, 2020-02-04. Colonial legacies in knowledge production affect the way the world is represented and understood today. However, the subject is rarely attended. The book *Colonial Legacies and Contemporary Studies of China and Chineseness: Unlearning Binaries, Strategizing Self* is about the colonial construction of intellectual perspectives of the colonized population in terms of the latter's approach to China and Chineseness in the modern world. Relying on the available oral histories of senior China scholars primarily in Asia, authors from various postcolonial and colonial sites present these multiple routes of self constitution and reconstitution through the use of China and Chineseness as category. The revealed manipulation of this third category romantically as well as antagonistically is easier than straightforward self reflection for us all to accept that coming to identities and relations none even subaltern is politically innocent or capable of epistemological monopoly. Through comparative studies, it shows a way of self understanding that does not always require discursive construction of border or cultural consumption of any specific other. With US-China rivalry possibly lasting for decades, this book offers extremely rich and contrasting practices from the subaltern worlds for anyone in a quest for humanist alternatives. This interdisciplinary and transnational project contributes to post colonial studies, cultural studies, international relations, China and Chinese studies, and the comparative histories of East Asia, Southeast Asia, and South Asia.
