Fearful Symmetry The Development And Treatment Of Sadomasochism Critical Issues In Psychoanalysis:

Fearful Symmetry Jack Novick, Kerry Kelly Novick, 2007-07-26 Using data from infant observation and child adolescent and adult analyses the Novicks explicate a multidimensional developmental theory of sadomasochism that has been recognized as a major innovation According to the Novicks each phase of development contributes to the clinical manifestations of sadomasochism Painful experiences in infancy are transformed into a mode of attachment then into an embraced marker of specialness and unlimited destructive power then into a conviction of equality with oedipal parents and finally into an omnipotent capacity to gratify infantile wishes through the coercion of others By school age these children have established a magic omnipotent system of thought which undermines alternate means of competent interactions with reality In adolescence and adulthood it becomes increasingly hard for them to deny avoid or distort reality without resorting to escalating self destructive behaviors Sadomasochistic phenomena are the source of severe resistances and counterreactions in all phases of therapy This book helps clinicians recognize and overcome these blocks to treatment progress and success Here can be found an introduction to the Novicks reformulation of the therapeutic alliance and their distinctive contributions to the transformations of memory and the termination of treatment

Nothing Good Is Allowed to Stand Léon Wurmser, Heidrun Jarass, 2012-10-12 Work with patients with severe neuroses very often has to cope with the phenomenon that every progress in the analytic or therapeutic work is followed paradoxically by a clinical deterioration There are a number of dynamic factors that converge to bring about this negative therapeutic reaction including many layered guilt and shame aspects of envy and jealousy attachment to negative affects turning trauma from passive to active conflicts within the superego and the defensive use of omnipotence of responsibility In *Nothing Good Is Allowed to Stand* Wurmser Jarass and their colleagues consider these and other factors insightfully such as the extent to which traumatization lives on in self directed aggressions of the superego in the claim of omnipotence the significant role of deep conflicts between opposite values and loyalties in bringing about the prohibition of anything good and thus of the negative therapeutic reaction in particular and masochism in general and the extent to which envy jealousy and resentment can be encountered in the inner object the inner judge i.e. the superego and how they are directed against the self
