Feast And Famine A History Of Food And Nutrition In Ireland 1500 19:

Feast and Famine Leslie Clarkson, Margaret Crawford, 2001-11-15 This book traces the history of food and famine in Ireland from the sixteenth to the early twentieth century It looks at what people ate and drank and how this changed over time The authors explore the economic and social forces which lay behind these changes as well as the more personal motives of taste preference and acceptability They analyze the reasons why the potato became a major component of the diet for so many people during the eighteenth century as well as the diets of the middling and upper classes This is not however simply a social history of food but it is a nutritional one as well and the authors go on to explore the connection between eating health and disease They look at the relationship between the supply of food and the growth of the population and then finally and unavoidably in any history of the Irish and food the issue of famine examining first its likelihood and then its dreadful reality when it actually occurred

A Modern History of the Stomach Ian Miller, 2015-10-06 This is the first exploration of the relationship between the abdomen and British society between 1800 and 1950 Miller demonstrates how the framework of ideas established in medicine related to gastric illness often reflected wider social issues including industrialization and the impact of wartime anxiety upon the inner body

Social change and

everyday life in Ireland, 1850-1922 Caitriona Clear, 2013-07-19 Men and women who were born grew up and died in Ireland between 1850 and 1922 made decisions to train to emigrate to stay at home to marry to stay single to stay at school based on the knowledge and resources they had at the time This the first comprehensive social history of Ireland for the years 1850 1922 to appear since 1981 tries to understand that knowledge and to discuss those resources for men and women at all social levels on the island as a whole Original research particularly on extreme poverty and public health is supplemented by neglected published sources local history journals popular autobiography newspapers Folklore and Irish language sources are used extensively All recent scholarly books in Irish social history are of course referred to throughout the book but it is a lively read reproducing the voices of the people and the stories of individuals whenever it can questioning much of the accepted wisdom of Irish historiography over the past five decades Statistics are used from time to time for illustrative purposes but tables and graphs are consigned to the appendix at the back There are some illustrations An idea summary for the student loaded with prompts for future research this book is written in a non cliched jargon free style aimed at the general reader *This Great Calamity: The Great Irish Famine* Christime Kinealy, 2006-05-02 The Great Famine of 1845 52 was the most decisive event in the history of modern Ireland In a country of eight million people the Famine caused the death of approximately one million while a similar number were forced to emigrate The Irish population fell to just over four million by the beginning of the twentieth century Christine Kinealy s survey is long established as the most complete scholarly survey of the Great Famine yet produced First published in 1994 This Great Calamity remains an exhaustive and indefatigable look into the event that defined Ireland as we know it today Hunger John R. Butterly, Jack Shepherd, 2010-12-14 A timely and provocative look at the role political developments and the biology of nutrition play in world famine **Ireland and the Industrial Revolution** Andy Bielenberg, 2009-05-07 Chapter Introduction part Part I The linen industry The lead sector in the industrialisation of Ulster chapter 1 The evolution of the linen industry prior to mechanisation 1700 1825 chapter 2 Transition the first generation of wet spinners 1825 50 chapter 3 The high watermark of the Ulster linen industry 1850 1914 part Part II Southern comfort The food drink and tobacco industries chapter 4 The food processing industries chapter 5 Drink and tobacco part PART III Missing links Engineering shipbuilding and the dearth of mineral wealth chapter 6 The mining and engineering industries chapter 7 Shipbuilding An exception to the rule part Part IV Construction and the Irish economy chapter 8 The timber trade and the Irish building industry **Ireland's Great Famine, Britain's Great Failure** William H. A. Williams, 2022-02-08 This book provides readers with a unique in depth understanding of the background to the Irish Famine and a detailed account of the crisis as well as the immediate and long term results of the catastrophe In addition to exploring the ecological and agriculture factors this work shows how cultural economic and political influences shaped British attitudes and policies When the entire potato crop failed in the fall of 1846 what began as an ecological disaster quickly became a political one Hampered by long standing prejudice and Anglo Irish tensions the

British government's various attempts to deal with the humanitarian crisis were muddled by competing economic and social goals. Among these was the idea that the Famine represented an opportunity to purge Ireland of fragmented land holding and potato dependency by encouraging an English type market driven agriculture. Changes did occur but the government's imperial dreams eventually ran up against Irish realities. *Irish Culture and Colonial Modernity 1800-2000* David Lloyd, 2011-09-22 From the Famine to political hunger strikes from telling tales in the pub to Beckett's tortured utterances the performance of Irish identity has always been deeply connected to the oral. Exploring how colonial modernity transformed the spaces that sustained Ireland's oral culture this book explains why Irish culture has been both so creative and so resistant to modernization. David Lloyd brings together manifestations of oral culture in the nineteenth and twentieth centuries showing how the survival of orality was central both to resistance against colonial rule and to Ireland's modern definition as a postcolonial culture. Specific to Ireland as these histories are they resonate with postcolonial cultures globally. This study is an important and provocative new interpretation of Irish national culture and how it came into being. **The Country Cooking of Ireland** Colman Andrews, 2012-12-21 The acclaimed food and travel writer brings to life the people, countryside and delicious food of Ireland in this James Beard Award winning cookbook. Fast emerging as one of the world's hottest culinary destinations Ireland is a country of small farms, artisanal bakers, cheese makers and butteries. Farm to table dining has been practiced here for centuries. Meticulously researched and reported by *Saveur* magazine founder Colman Andrews this sumptuous cookbook includes 250 recipes and more than 100 photographs of the pubs, the people and the emerald Irish countryside taken by award winning photographer Christopher Hirsheimer. Rich with stories of the food and people who make Ireland a wonderful place to eat and laced with charming snippets of song, folklore and poetry *The Country Cooking of Ireland* ushers in a new understanding of Irish food. **Bessie Quinn: Survivor Spirit** Ursula Howard, 2022-03-31 Bessie Quinn was an early 20th century New Woman, a mother living her love story in the enchanted world of the Garden City. When she died in the Spanish Flu epidemic of 1918-19 her shattered husband abandoned her, memory, belongings and life history. Her disappearance reverberated down generations. Starting with only an Arts and Crafts kettle, one photo and a linen smock Ursula has restored her grandmother to life. After long searches she found Bessie in the Scottish Borders, eighth child of working class Irish parents who fled hunger after the Great Famine of the 1840s. This biography of a poor family unearths hard journeys of love, luck and loss, weaving historical fact with memory and imagination into a compelling story. *Manuscript Recipe Books as Archaeological Objects* Madeline Shanahan, 2014-11-18 During the mid to late seventeenth century women in Irish houses from elite backgrounds started to collect recipes which they recorded in domestic manuscripts. While these manuscripts were made elsewhere at an earlier date they were an almost entirely new arrival to Ireland in this period and their sudden proliferation said much about changes taking place in society at large. This book is a detailed study of such manuscripts from the perspective of historical archaeology which will argue that they are

artifacts which clearly demonstrate that a profound series of changes was taking place. The written word penetrated people's daily lives and homes to a degree that it had not in previous periods and it had a profound influence on how they related to their world objects and each other. While this book will address how we can use them as sources for the study of food history and material culture, it is ultimately concerned with the meanings of manuscript recipe books and specifically what they say about the individuals and society that made them. The proliferation of these manuscripts signaled a profound change not just in cuisine but also in the way people thought about and related to food as a form of material culture. Ultimately, this book will argue that these manuscripts are not simply excellent records which can tell us about material culture within the early modern house but that they are a profoundly important type of artifact in their own right. Undertaking research that situates textual objects such as recipe books at the very core of historical archaeology is critical to understanding some of the most significant changes that took place in the early modern world. *Food in Nineteenth-Century British History* Ian

Miller, 2025-07-25 For all classes British eating habits changed dramatically in the long nineteenth century. Volume two offers a collection of sources that shed light on what people ate and cooked at home and also while they were out and about. Cookery books are an obvious primary source and these range from popular books aimed largely at servants responsible for providing meals to middle and upper class families to less lavish recipes contained in books intended for school cookery classes which would then be prepared at home. Food, Energy and the Creation of Industriousness Craig

Muldrew, 2011-02-03 Until the widespread harnessing of machine energy, food was the energy which fuelled the economy. In this groundbreaking 2011 study of agricultural labourers' diet and material standard of living, Craig Muldrew uses empirical research to present a much fuller account of the interrelationship between consumption, living standards and work in the early modern English economy than has previously existed. The book integrates labourers into a study of the wider economy and engages with the history of food as an energy source and its importance to working life, the social complexity of family earnings and the concept of the industrious revolution. It argues that industriousness was as much the result of ideology and labour markets as labourers' household consumption. Linking this with ideas about the social order of early modern England, the author demonstrates that bread, beer and meat were the petrol of this world and a springboard for economic change.

Coastal Environments in the West of Ireland John B. Roney, Mark Beekey, 2022-11-16 This multi authored study explores how the natural sciences and the humanities together can understand the connections between the natural environment the built environment and the cultural heritage of communities along the west coast of Ireland Knowledge of the sea and marine life and what they mean to humanity is dependent on both scientific study and local knowledge which in turn can lead to a greater commitment to sustainability Until the 1950s there was little government support for scientific research nor an interest in helping fisheries beyond near shore catch Irish fisheries remained small underfunded and had difficulty accessing international markets However as this book shows Ireland s cultural heritage demonstrates a deep appreciation for the coastal environment and a sense of place This is preserved in the Irish language in poetry story and music and in the ways the Irish lived with an often wild coastal topography

The First Irish Cities David Dickson, 2021-01-01 The untold story of a group of Irish cities and their remarkable development before the age of industrialization A backward corner of Europe in 1600 Ireland was transformed during the following centuries This was most evident in the rise of its cities notably Dublin and Cork David Dickson explores ten urban centers and their patterns of physical social and cultural evolution relating this to the legacies of a violent past and he reflects on their subsequent partial eclipse Beautifully illustrated this account reveals how the country s cities were distinctive and through the Irish diaspora influential beyond Ireland s shores
