

Chapter 2: Policy Standards for a Good Tax

Questions and Problems for Discussion

1. This question is designed to lead to a class discussion of the various tax policy issues introduced in Chapter 2.
2. Historically, the federal income tax system has not generated enough revenue to fund the government's spending programs. Consequently, the federal government has borrowed money to make up its deficits (excess of spending over revenues) and, in doing so, has amassed an \$11 trillion national debt. The federal government operated at a deficit in every year from 1970 through 1995. In 1996 and 2000, it operated at a small surplus (excess of revenues over spending) but reverted to massive deficit spending in 2001 and subsequent years.
3. Governments can impose a new tax (by identifying and taxing a new base), increase the rate of an existing tax, or expand the base of an existing tax.
4. Governments that fail to control the growth of their money supply run the risk of devaluing the currency and triggering a crippling rate of inflation. Therefore, simply printing more money to fund an operating deficit is not a viable, long-term solution to an insufficient tax system.
5.
 - a. Mrs. Edwards could enter the work force. The additional after-tax earnings would potentially offset the decrease in the couple's disposable income attributable to the tax rate increase. If Mr. Edwards works for an hourly wage, the impact of the tax rate increase could be offset by working additional hours to generate additional income. If Mr. Edwards does not have this option, additional income could be generated by taking a second job or even starting a new business.
 - b. As a self-employed individual, Mrs. Frank may have the flexibility to generate more income by increasing the number of hours devoted to the business. The additional after-tax earnings could offset the decrease in the couple's disposable income attributable to the tax rate increase. Mr. Frank has the same options as Mr. Edwards.
 - c. In this case, Mr. and Mrs. George have the same options as Mr. Edwards and Mr. Frank. (Because they are both full-time employees, their ability to increase their before-tax income may be limited.)
6.
 - a. Mrs. Akai may not have any realistic way to decrease the time spent at work and increase leisure time, even if the tax rate increase means the after-tax value of labor decreases. Mrs. Akai's behavior should not change because of a tax rate increase.
 - b. Mr. Junga could resign and leave the work force if the couple decides that additional leisure time is worth more than the after-tax value of Mr. Junga's labor.
 - c. As a self-employed individual, Mrs. Kahn has the flexibility to decrease the number of hours devoted to business activities, thereby substituting additional leisure time for labor.
7. An increase in the income tax rate decreases the after-tax value of the bond investment but does not affect the value of the luxury auto. (The personal use and enjoyment of the auto are nontaxable.
