Heather Brunsell-Evans, 2017-01-06 This edited collection examines pornography as a material practice that eroticises gender inequality and sexual violence towards women It addresses the complex relationship between pornography and medicine in particular sexology and psycho therapy whereby medicine has historically and currently afforded pornography considerable legitimacy and even authority Pornography naturalises women's submission and men's dominance as if gendered power is rooted in biology not politics In contrast to the populist view that medicine is objective and rational the contributors here demonstrate that medicine has been complicit with the construction of gender difference and in that construction the relationship with pornography is not incidental but fundamental A range of theoretical approaches critically engages with this topic in the light firstly of radical feminist ideas about patriarchy and the politics of gender and secondly of the rapidly changing conditions of global capitalism and digital technologies In its broad approach the book also engages with the ideas of Michel Foucault particularly his refutation of the liberal hypothesis that sexuality is a deep biological and psychological human property which is repressed by traditional patriarchal discourses and which can be freed from authoritarianism for example by producing and consuming pornography In taking pornography as a cultural and social phenomenon the concepts brought to bear by the contributors critically
