 Zenger,2012-12-06 In Douglas Adams book Hitchhiker s Guide to the Galaxy hyper intelligent beings reached a point in their  
 existence where they wanted to understand the purpose of their own existence and the universe They built a supercomputer  
 called Deep Thought and upon completion they asked it for the answer to the ultimate question of life the universe and  
 everything else The computer worked for several millennia on the answers to all these questions When the day arrived for  
 hyper intelligent beings the to receive the answer they were stunned shocked and disappointed to hear that the answer was  
 simply 42 The still open questions to scientists and engineers are typically much simpler and consequently the answers are  
 more reasonable Furthermore because human beings are too impatient and not ready to wait for such a long period high  
 performance computing techniques have been developed leading to much faster answers Based on these developments in the  
 last two decades scientific and engineering computing has evolved to a key technology which plays an important role in  
 determining or at least shaping future research and development activities in many branches of industry Development work  
 has been going on all over the world resulting in numerical methods that are now available for simulations that were not  
 foreseeable some years ago However these days the availability of supercomputers with Teraflop performance supports  
 extensive computations with technical relevance A new age of engineering has started      **Careers in IT Consulting**
