* Always add acid to water. The addition of acid to water is an exothermic reaction. Use high temperature (e.g., Pyrex®) glassware.

† Commercially available; additional safety material is on file with the appropriate laws.

‡ Other amount of volume required to prepare one liter of solution.

Preparing Sulfuric Acid Solution?

Always **ADD ACID TO WATER**! A great amount of heat is liberated when sulfuric acid is added to water. The temperature of the solution will rise rapidly. In fact, the temperature may rise so fast that the solution will boil and possibly spatter a strongly acidic solution. Consider containing your mixing vessel in a bucket of ice to control the solution temperature. Always add the acid to water very slowly while stirring continuously.
