What You Know About Solutions

What can you tell about the saturation of a solution using a crystal of the solute?

Can you do an experiment to determine if a solution is saturated?

Sure. Take a crystal of the solute and drop it into the solution, then observe what happens:

If it dissolves, the solution is unsaturated.

If it falls to the bottom, the solution is saturated.

If more crystals form, the solution is supersaturated.

Learn more about solutions and their properties while studying this topic.
