

2. Imagine we have mixture of Wheat Chex, Rice Chex, Cheerios, pretzel sticks, marshmallows, and raisins but not all members of the group like each ingredient. What are the properties of each item and how will I separate them out?

color, shape, texture, size, hardness

3. What is the effect of temperature on water in each of its states of matter?

Ice- heat above 0°C melts to liquid water- heat above 100°C turns it to water vapor , Below 0°C it freezes water vapor- temperatures below 100°C changes it to liquid

4. What are the differences between a chemical and physical change? Give an example of each.

A _____ change means there is a new substance formed or a different type of matter than there was.

a bruised apple

A _____ change means it is still the same type of matter even though it may have changed state, or shape or size or many other physical properties a chopped apple

5. Your Science project is coming up. What is the control versus the variable? What would happen if you did not have a control?

The control is used to compare to the parts you are changing. The control is usually the "normal" condition.

The variables are the parts of the experiment you are changing or testing.

Chemistry, Student Study Guide James E. Brady, Fred Senese, 2008-01-28 The image on the front cover depicts a carbon nanotube emerging from a glowing plasma of hydrogen and carbon as it forms around particles of a metal catalyst Carbon nanotubes are a recently discovered allotrope of carbon Three other allotropes of carbon buckyballs graphite and diamond are illustrated at the left as is the molecule methane CH_4 from which nanotubes and buckyballs can be made The element carbon forms an amazing number of compounds with structures that follow from simple methane found in natural gas to the complex macromolecules that serve as the basis of life on our planet The study of chemistry also follows from the simple to the more complex and the strength of this text is that it enables students with varied backgrounds to proceed together to significant levels of achievement

General Chemistry Workbook Daniel C. Tofan,2010-07-28 This workbook is a comprehensive collection of solved exercises and problems typical to AP introductory and general chemistry courses as well as blank worksheets containing further practice problems and questions It contains a total of 197 learning objectives grouped in 28 lessons and covering the vast majority of the types of problems that a student will encounter in a typical one year chemistry course It also contains a fully solved 50 question practice test which gives students a good idea of what they might expect on an actual final exam covering the entire material
