Geographic Information Wolfgang Kresse, David M. Danko, 2012-02-21 Computer science provides a powerful tool that was virtually unknown three generations ago. Some of the classical fields of knowledge are geodesy, surveying, cartography, and geography. Electronics have revolutionized geodetic methods. Cartography has faced the dominance of the computer that results in simplified cartographic products. All three fields make use of basic components such as the Internet and databases. The Springer Handbook of Geographic Information is organized in three parts: Basics, Geographic Information, and Applications. Some parts of the basics belong to the larger field of computer science. However, the reader gets a comprehensive view on geographic information because the topics selected from computer science have a close relation to geographic information. The Springer Handbook of Geographic Information is written for scientists at universities and industry as well as advanced and PhD students.

Handbook of Diesel Engines Klaus Mollenhauer, Helmut Tschöke, 2010-06-22 This machine is destined to completely revolutionize cylinder diesel engine up through large low speed to engine engineering and replace everything that exists stroke diesel engines. An appendix lists the most important standards and regulations for diesel engines. From Rudolf Diesel's letter of October 2, 1892 to the important standards and regulations for diesel engines published by Julius Springer. Further development of diesel engines as economical. Although Diesel's stated goal has never been fully achieved, clean, powerful, and convenient drives for road and off-road use have proceeded quite dynamically in the modernized drive systems. This handbook documents the last twenty years in particular. In light of limited oil resources and the discussion of predicted climate change, the impetus to publish a Handbook of Diesel engine development work continues to concentrate. Engines grew out of ruminations on Rudolf Diesel's on reducing fuel consumption and utilizing alternative fuels. Transformation of his idea for a rational heat engine while keeping exhaust as clean as possible as well into reality more than 100 years ago. Once the patent was further increasing diesel engine power density and was filed in 1892 and work on his engine commenced enhancing operating performance.
