

## STORYTELLING

1- Arrange the pictures to create a story.

--	--	--	--	--	--

2- Now, read the original story and put the pictures in the right order.

This is a story about a poor and little boy named Jack. Jack's mother asks him to sell the cow, but Jack instead of selling it, he exchanges the cow for magical beans.

When the mother sees that Jack didn't sell the cow, she gets angry. She sends Jack to sleep and throws the beans away. Jack goes to his room really sad.

The next morning, when Jack wakes up, he sees that in the place of the beans now there is a really big plant passing the clouds.

Jack climbs and climbs past the clouds. Up there, he discovers a castle.

**Creative Story-Telling Journal** Danny Pettry, II, 2015-11-27 Creative Story Telling Journal 50 simple ready to use story telling worksheets designed to empower you to unleash your creative writing Therapeutic outcomes This journal could help to improve awareness of emotions the ability to recognize facial expressions and body language associated with emotions and to help express personal thoughts and feelings through story telling However as noted in the disclaimer on the previous page this book is not a substitute for medical or professional advice Look at the picture shown on each page Write four words that pop in mind from the picture Try to include a noun an emotion a verb and an adjective Set a timer for 60 seconds 5 minutes or 10 minutes You can set your timer for as much time as you wish Write non stop as soon as the timer starts until it ends Be sure to use all four words before the timer ends Do not worry about spelling or grammar You can go back and edit later Just get in the habit of writing as much as you can in a very little time You can use a pencil or ink pen You can even type your stories print them and paste them below the pictures Teachers or group leaders may want to encourage participants to share their stories aloud However please don't force a person to share a story they'd rather keep private Encourage those who share to be dramatic in their story telling with the use of their tone of voice and body language to make it fun *Practical Storytelling* Dominic R. Villari, 2008-06 People are instinctively drawn to hearing stories and telling stories Practical Storytelling explains the mechanics of how and why stories work It provides several step by step processes to help you create and tell your own stories to improve business and personal relationships The example stories presented here including the central story Tan's Tile were chosen to demonstrate each aspect of story development Practical Storytelling breaks a story down into a set of core components and explains how you can construct each one You'll learn to implement stories in business and social settings including sales marketing meetings training and more This hands on guide also includes a glossary exercises worksheets and sample stories Topics include attract attention and achieving retention affecting behavior story types theme development audience analysis character design plot construction acts and scenes factoring the environment collecting stories and story delivery Transforming University Biochemistry Teaching Using Collaborative Learning and Technology Penny J. Gilmer, 2010-03-10 One aim of Gilmer's captivating text on university pedagogy is to show that biochemistry or any science does not consist solely of facts to be learned but is a way of thinking about the world Her purpose both in this book and in her classroom is to make her students into critical thinkers rather than passive learners The chapters cast a critical eye over research into enhanced education techniques such as collaborative learning Gilmer describes the action research she conducted in her own biochemistry undergraduate classroom into ways of improving the learning environment She offers various perspectives on the make up of her classroom including an analysis of ethnographic data The tools Gilmer employs as she hones her teaching skills include collaborative learning and technology She views the classroom through various theoretical perspectives social constructivism cultural historical activity theory and a theory that

involves the dialectic between the structure of the learning environment and the agency of the learners a group among whom she includes herself She provides a wealth of autobiographical detail as well as the results of her action research which followed up on its original subjects after an interval of 11 years to see what impact her course had on their professional growth Above all this volume is proof of what can be achieved in education when teachers are as interested in the process of learning as they are in their subject itself *Resources in Education*, 2000-10 *Creativity and Writing* Teresa Grainger, Kathy Goouch, Andrew Lambirth, 2005 This accessible yet authoritative book considers and encourages flexible playful and innovative practices in the teaching of writing and shows how certain practices can develop children's creative and linguistic potential and their overall skill **Teaching and Researching Writing** Ken Hyland, 2021-09-23 The new edition of Ken Hyland's text provides an authoritative guide to writing theory research and teaching Emphasising the dynamic relationship between scholarship and pedagogy it shows how research feeds into teaching practice Teaching and Researching Writing introduces readers to key conceptual issues in the field today and reinforces their understanding with detailed cases then offers tools for further investigating areas of interest This is the essential resource for students of applied linguistics and language education to acquire and operationalise writing research theories methods findings and practices as well as for scholars and practitioners looking to learn more about writing and literacy New to the fourth edition Added or expanded coverage of important topics such as translingualism digital literacies and technologies multimodal and social media writing action research teacher reflection curriculum design teaching young learners and discipline specific and profession specific writing Updated throughout including revision to case studies and classroom practices and discussion of Rhetorical Genre Studies intercultural rhetoric and expertise Reorganised References and Resources section for ease of use for students researchers and teachers *Creativity and Divergent Thinking* John Baer, 2014-01-09 Do general purpose creative thinking skills skills like divergent thinking which is touted as an important component of creative thinking no matter what the task domain actually make much of a contribution to creative performance Although much recent research argues against such domain transcending skills including several new studies reported in this book the appeal of such general skills remains strong probably because of the theoretical economy and power such skills would provide Divergent thinking in particular has had an incredible staying power Despite its many flaws divergent thinking remains the most frequently used indicator of creativity in both creativity research and educational practice and divergent thinking theory has a strong hold on everyday conceptions of what it means to be creative Reviewing the available research on divergent thinking this book presents a framework for understanding other major theories of creativity including Mednick's associative theory and a possible connectionist approach of creativity It reports a series of studies including the study that won APA's 1992 Berlyne Prize that demonstrate the absence of effects of general creative thinking skills across a range of creativity relevant tasks but indicate that training in divergent thinking does in fact improve creative performance across diverse task domains

The book then ties these findings together with a multi level theory in which a task specific approach to creativity is strengthened by recasting some divergent thinking concepts into domain and task specific forms This book fills the gap between divergent thinking theory and more recent modular conceptions of creativity Rather than advocate that we simply discard divergent thinking an approach that hasn t worked or at least hasn t happened because of many attacks on its validity and usefulness this book shows how to separate what is useful in divergent thinking theory and practice from what is not It shows that divergent thinking training can be valuable although often not for the reasons trainers think it works And it offers specific suggestions about the kinds of creativity research most needed today
