**Lessons from the States** United States. Congress. House. Committee on the Judiciary. Subcommittee on Crime, Terrorism, Homeland Security, and Investigations, 2014      Policing the Borders Within Ana Aliverti, 2021-06-25 Policing the Borders Within offers an in depth comprehensive exploration of the everyday working of inland border controls in Britain informed by extensive empirical material viewed through the lens of wide ranging interdisciplinary debates In particular this book examines afresh the relationship between policing borders and social order in terms of migration policing By charting this new landscape of everyday contemporary policing this book s main goal is to advance understanding of novel forms of law enforcement in a global age These new forms of collaboration direct attention to the way in which frontline enforcement agents through their everyday work not only enforce the border but recreate it As the book argues the emphasis on borders and migration controls and the growing importance of it within inland policing is a symptom of the new demands and challenges facing the state in exercising authority in a fast moving interconnected world and its attempt to offer a semblance of order Such challenges result in practice of random capricious informal and arbitrary operation of power which relies on non rational elements to solve policing problems Through an ethnography of the worlds of police and immigration officers this book dissects the ethical political legal and social dilemmas and explores the tensions and contradictions of maintaining order in a deeply unequal globalized world The new impetus to police migration is an insightful entry point to understand law enforcement in a global age      **DARE to Say No** Max Felker-Kantor, 2024-04-02 With its signature DARE to keep kids off drugs slogan and iconic t shirts DARE Drug Abuse Resistance Education was the most popular drug education program of the 1980s and 1990s But behind the cultural phenomenon is the story of how DARE and other antidrug education programs brought the War on Drugs into schools and ensured that the velvet glove of antidrug education would be backed by the iron fist of rigorous policing and harsh sentencing Max Felker Kantor has assembled the first history of DARE which began in Los Angeles in 1983 as a joint venture between the police department and the unified school district By the mid 90s it was taught in 75 percent of school districts across the United States DARE received near universal praise from parents educators police officers and politicians and left an indelible stamp on many millennial memories But the program had more nefarious ends and Felker Kantor complicates simplistic narratives of the War on Drugs He shows how policing entered US schools and framed drug use as the result of personal responsibility moral failure and poor behavior deserving of punishment rather than something deeply rooted in state retrenchment the abandonment of social service provisions and structures of social and economic inequality      **Corruption in the Global Era** Lorenzo Pasculli, Nicholas Ryder, 2019-03-05 Corruption is a globalising phenomenon Not only is it rapidly expanding globally but more significantly its causes its means and forms of perpetration and its effects are more and more rooted in the many developments of globalisation The Panama Papers the FIFA scandals and the Petrobras case in Brazil are just a few examples of the rapid and alarming globalisation of corrupt

practices in recent years The lack of empirical evidence on corrupt schemes and a still imperfect dialogue between different disciplinary areas and between academic and practitioners hinder our knowledge of corruption as a global phenomenon and slow down the adoption of appropriate policy responses Corruption in the Global Era seeks to establish an interdisciplinary dialogue between theory and practice and between different disciplines and to provide a better understanding of the multifaceted aspects of corruption as a global phenomenon This book gathers top experts across various fields of both the academic and the professional world including criminology economics finance journalism law legal ethics and philosophy of law to analyze the causes and the forms of manifestation of corruption in the global context and in various sectors sports health care finance the press etc from the most disparate perspectives The theoretical frameworks elaborated by academics are here complemented by precious insider accounts on corruption in different areas such as banking and finance and the press The expanding links between corrupt practices and other global crimes such as money laundering fraud and human trafficking are also explored This book is an important resource to researchers academics and students in the fields of law criminology sociology economics and ethics as well as professionals particularly solicitors barristers businessmen and public servants

**Excessive Punishment** Lauren-Brooke Eisen,2024-04-09 The United States has by far the world's largest population of incarcerated people More than a million Americans are imprisoned hundreds of thousands more are held in jails This vast system has doled out punishment particularly to people from marginalized groups on an unfathomable scale At the same time it has manifestly failed to secure public safety instead perpetuating inequalities and recidivism Why does the United States see punishment as the main response to social harm and what are the alternatives This book brings together essays by scholars practitioners activists and writers including incarcerated and formerly incarcerated people to explore the harms of this punitive approach The chapters address a range of issues from policing to prosecution and from how people are treated in prison to the consequences of a criminal conviction Together they consider a common theme We cannot reduce our dependence on mass incarceration until we confront our impulse to punish in ways that are excessive often wildly disproportionate to the harm caused Essays trace how a maze of local state and federal agencies have contributed to mass incarceration and deterred attempts at reform They shed light on how the excesses of America's criminal legal system are entwined with poverty racism and the legacy of slavery A wide ranging and powerful look at the failures of the status quo Excessive Punishment also considers how to reimagine the justice system to support restoration instead of retribution

Non-Adversarial Justice Michael King,Arie Freiberg,Becky Batagol,Ross Hyams,2014-07-04 This book outlines key aspects of the use of non adversarial practices in the Australian justice system with reference to similar developments in the United States Canada New Zealand and the United Kingdom It examines in detail non adversarial theories and practices such as therapeutic jurisprudence restorative justice preventive law creative problem solving holistic law appropriate or alternative dispute resolution collaborative law problem oriented courts diversion programs indigenous courts coroners

courts and managerial and administrative procedures      *Hard Bargains* Mona Lynch,2016-11-01 The convergence of tough on crime politics stiffer sentencing laws and jurisdictional expansion in the 1970s and 1980s increased the powers of federal prosecutors in unprecedented ways In *Hard Bargains* social psychologist Mona Lynch investigates the increased power of these prosecutors in our age of mass incarceration Lynch documents how prosecutors use punitive federal drug laws to coerce guilty pleas and obtain long prison sentences for defendants particularly those who are African American and exposes deep injustices in the federal courts As a result of the War on Drugs the number of drug cases prosecuted each year in federal courts has increased fivefold since 1980 Lynch goes behind the scenes in three federal court districts and finds that federal prosecutors have considerable discretion in adjudicating these cases Federal drug laws are wielded differently in each district but with such force to overwhelm defendants ability to assert their rights For drug defendants with prior convictions the stakes are even higher since prosecutors can file charges that incur lengthy prison sentences including life in prison without parole Through extensive field research Lynch finds that prosecutors frequently use the threat of extremely severe sentences to compel defendants to plead guilty rather than go to trial and risk much harsher punishment Lynch also shows that the highly discretionary ways in which federal prosecutors work with law enforcement have led to significant racial disparities in federal courts For instance most federal charges for crack cocaine offenses are brought against African Americans even though whites are more likely to use crack In addition Latinos are increasingly entering the federal system as a result of aggressive immigration crackdowns that also target illicit drugs *Hard Bargains* provides an incisive and revealing look at how legal reforms over the last five decades have shifted excessive authority to federal prosecutors resulting in the erosion of defendants rights and extreme sentences for those convicted Lynch proposes a broad overhaul of the federal criminal justice system to restore the balance of power and retreat from the punitive indulgences of the War on Drugs
