Murali Sivaramakrishnan, Animesh Roy, 2023-12-15 The idea in Post Green Literature Culture and the Environment is not to create another binary like East West but rather a call for a shift in the order of perception The contributors signal a movement from the conventional understanding of green thinking acknowledging human centered limitations of the green approaches and recognising the immense possibilities and holistic perspectives that a symbiotic human nature perspective offers This book proposes to move beyond the monoculture of the mind toward a celebration of diversity and plurality While the movement from red to green was a politics of difference as essays in this book emphasize the shift toward post green is based on an all inclusive and holistic vision that contains within itself both difference and multiplicity something that is quintessential for the stability of our ecosystem Such affirmative bio politics toward an alternative symbiosis challenges intellectual theorising without minimizing the need for radical questioning It urges the need to do away with disciplinary boundaries drawing hopes for a new spiritual geography of the mind to surface *Ecology and Revolution* Charles Reitz, 2018-10-11 A timely addition to Henry Giroux's Critical Interventions series Ecology and Revolution is grounded in the Frankfurt School critical theory of Herbert Marcuse Its task is to understand the economic architecture of wealth extraction that undergirds today's intensifying inequalities of class race and gender within a revolutionary ecological frame Relying on newly discovered texts from the Frankfurt Marcuse Archive this book builds theory and practice for an alternate world system Ecology and radical political economy as critical forms of systems analysis show that an alternative world system is essential both possible and feasible despite political forces against it Our rights to a commonwealth economy politics and culture reside in our commonworks as we express ourselves as artisans of the common good It is in this context that Charles Reitz develops a GreenCommonWealth Counter Offensive a strategy for revolutionary ecological liberation with core features

**Marcuse in the Twenty-First Century** Robert Kirsch,Sarah Surak,2018-12-07 This book engages the critical theory of political philosopher Herbert Marcuse to imagine spaces of resistance and liberation from the repressive forces of late capitalism Marcuse an influential counterculture voice in the 1960s highlighted the smooth democratic unfreedom of postwar

capitalism a critique that is well adapted to the current context The compilation begins with a previously unpublished lecture delivered by Marcuse in 1966 addressing the inadequacy of philosophy in its current form arguing how it may be a force for liberation and social change This lecture provides a theoretical mandate for the volume s original contributions from international scholars engaging how topics such as higher education aesthetics and political organization can contribute to the project of building a critical rationality for a qualitatively better world offering an alternative to the bleak landscape of neoliberalism The essays in this volume as whole engage the current context with an urgency appropriate to the problems facing an encroaching authoritarianism in political society with an interdisciplinary lens that speaks to the complexity of the problems facing modern society The chapters originally published as a special issue in *New Political Science*     *The SAGE Handbook of Frankfurt School Critical Theory* Beverley Best, Werner Bonefeld, Chris O’Kane, 2018-06-04 The SAGE Handbook of Frankfurt School Critical Theory expounds the development of critical theory from its founding thinkers to its contemporary formulations in an interdisciplinary setting It maps the terrain of a critical social theory expounding its distinctive character vis a vis alternative theoretical perspectives exploring its theoretical foundations and developments conceptualising its subject matters both past and present and signalling its possible future in a time of great uncertainty Taking a distinctively theoretical interdisciplinary international and contemporary perspective on the topic this wide ranging collection of chapters is arranged thematically over three volumes Volume I Key Texts and Contributions to a Critical Theory of Society Volume II Themes Volume III Contexts This Handbook is essential reading for scholars and students in the field showcasing the scholarly rigor intellectual acuteness and negative force of critical social theory past and present     *Critical Theory and Authoritarian Populism* Jeremiah Morelock, 2018-12-17 After President Trump s election BREXIT and the widespread rise of far Right political parties much public discussion has intensely focused on populism and authoritarianism In the middle of the twentieth century members of the early Frankfurt School prolifically studied and theorized fascism and anti-Semitism in Germany and the United States In this volume leading European and American scholars apply insights from the early Frankfurt School to present day authoritarian populism including the Trump phenomenon and related developments across the globe Chapters are arranged into three sections exploring different aspects of the topic theories historical foundations and manifestations via social media Contributions examine the vital political psychological and anthropological theories of early Frankfurt School thinkers and how their insights could be applied now amidst the insecurities and confusions of twenty first century life The many theorists considered include Adorno Fromm L. W. and Marcuse alongside analysis of Austrian Facebook pages and Trump s tweets and operatic media drama This book is a major contribution towards deeper understanding of populism s resurgence in the age of digital capitalism     **Pedagogy in Practice: Theoretical Frameworks, Instructional Strategies, and Contextual Influences** Rajendra Kumar Shah, 2025-03-11 Teaching is an inherently intricate intellectually demanding and multifaceted endeavor Since antiquity

eminent educational philosophers from Socrates and Plato to contemporary scholars have engaged in profound discourse on optimizing pedagogical effectiveness. With the institutionalization of formal education, teaching predominantly evolved within a teacher-centered paradigm, a model that continues to exert considerable influence in educational settings. However, mounting critiques of this approach have catalyzed the advancement of learner-centered pedagogy. Notably, Rousseau's advocacy for child-centered pedagogy served as a pivotal foundation for subsequent theoretical and practical developments in learner-centered pedagogy. Consequently, efforts are underway to integrate this paradigm to varying degrees into educational systems across the globe. During the 1970s, the field of education witnessed the emergence of groundbreaking intellectual discourses that critically examined various dimensions of formal education, including its objectives, pedagogical frameworks, curricular structures, and assessment methodologies. This period also marked the growing recognition of education as an inherently political enterprise inseparable from broader sociopolitical dynamics. Within this context, the distinguished educational theorist Paulo Freire conducted a profound critique of conventional education systems, characterizing them as the banking model of education. He vehemently opposed traditional instructional practices, advocating instead for a critical and emancipatory pedagogical approach designed to facilitate societal transformation. The teaching-learning process can be categorized into teacher-centered, learner-centered, and transformation-centered approaches, each with distinct philosophical underpinnings and pedagogical implications. However, a significant gap persists in the availability of comprehensive scholarly resources that facilitate an in-depth assessment of these pedagogical paradigms. How can teacher-centered pedagogy be refined to optimize its efficacy? Despite its emphasis on active engagement, learner-centered education has also been subject to critique. How can its limitations be systematically addressed to enhance instructional effectiveness? Furthermore, what constitutes transformative education, and how can it be meaningfully integrated into classroom practice? These questions are of paramount significance to educators, parents, students, educational administrators, and curriculum developers. This book endeavors to explore these critical themes with the aspiration that it will provide valuable insights to its readers, however modest the impact may be.

**The Dialectics of Liberation in Dark Times** Taylor Hines, Peter-Erwin Jansen, Robert E. Kirsch, Terry Maley, 2023-09-29. This book develops Marcuse's critique of advanced industrial society and deploys it as a lens to critically analyze contemporary neoliberalism and its structural failures. In the chapters, Marcuse scholars explore three related topics. First, Marcuse's theory as it applies to the relationship between neoliberalism and authoritarianism, including both the historical relationship between the two and the modern re-emergence of authoritarianism and nationalism in neoliberal states today. Second, a re-examination of the relationship between neoliberal subjectivity and technological rationality that seeks to understand the stabilizing forces of neoliberal society and the way these forces register at the level of thought. Third, and finally, Marcuse's conception of socialism in conversation with contemporary neoliberal rationality and ways in which alternatives to the status quo remain possible. Together, this volume

contributes to recent discussions of neoliberalism and contribute to the development of Marcuse scholarship Horizons of the Future Graham B. Slater, 2024-06-14 Horizons of the Future Science Fiction Utopian Imagination and the Politics of Education examines the relationship between science fiction education and social change in the 21st century Global capitalism is ecologically unsustainable and ethically indefensible time is running out to alter the course of history if humanity is to have hope of a livable future beyond the next century However alternatives are possible offering much more equality care justice joy and hope than the established order Popular culture and schools are key sites of struggles to imagine such alternatives Drawing on critical theory cultural studies and sociology Slater articulates the promising connection between science fiction and the future of education He offers cutting edge engagement with themes perspectives and modes of imagination in science fiction that can be mobilized politically and pedagogically to envision and enact critical forms of education that cultivate new utopian ways of relating to self society and the future This thought provoking book will be of interest to scholars and students in the social sciences and education

learning This new democratic system of education was associated with the highest ideals of postwar progress liberalism and humanism yet its recommendations were paradoxically both profoundly radical and fundamentally conservative Its avant garde research strategies and controversial post literate curricular reforms were balanced by a pedagogical approach designed to mould students into obedient citizens and productive economic actors As Canadians once again find themselves asking fundamental questions about the aims and objectives of education under radically changing circumstances Josh Cole revisits Hall Dennis to show how the committee and its report represent a significant moment in Canadian cultural and political history a prescient document in the history of education and a revealing expression of the fragmentary circumstances of global modernity in the second half of the twentieth century
