Saleh, 2016-07-19. No matter where we work or what we do, there is no stopping the fact that at some point in our lives we will encounter a crisis. How an individual responsible for dealing with these types of situations reacts is ultimately the deciding factor as to whether or not they come out safely on the other side. *Crisis Management: The Art of Success and Failure* focuses on different types of crises, symptoms, and models that recurrently threaten business and political environments. Pulling from no better teacher than history itself, *Crisis Management* is broken into 30 case studies that provide analysis and theoretical approaches that explore both successful and unsuccessful examples of management in the midst of crisis. While focusing primarily on business and politics, *Crisis Management* is a powerful tool for all readers who wish to understand how to better tackle crises when they arise. Learning how to remain calm and deal with critical situations is a skill that can be learned and mastered. **Training Manual for Human Service Workers in Major Disasters** Institute for the Studies of Destructive Behaviors and the Los Angeles Suicide Prevention Center (Calif.), 1990. **Crisis in the American Heartland -- Coming Home** George W. Doherty, 2013-03-01. Veterans in rural communities face unique challenges who will step up to help. Beginning with a brief scenario of a more gentle view of rural life, the book moves through learned information about families, children, and our returning National Guard and Reserve civilian military members. Return experiences will necessarily be different in rural and frontier settings than they are in suburban and urban environments. Our rural and frontier areas, especially in Western states with more isolated communities, less developed communication, and limited access to medical, psychological, and social services, remain an important concern. This book helps provide some informed direction in working toward improving these as a general guide for mental health professionals working with Guard and Reserve members and families in rural frontier settings. An appendix provides an in-depth list of online references for Traumatic Brain Injury (TBI). Specific areas of concern include Morale, deployment abroad, and stress factors. Effects of terrorism on children and families at home. Understanding survivor guilt. Post Traumatic Stress Disorder (PTSD) and suicide. Preventing secondary traumatization. Resiliency among refugee populations and military families. Adjustment and reintegration following the Iraq and Afghanistan Wars. Vicarious trauma and its effects on children and adults. How rural and remote communities differ from more urban ones following war experiences in readjusting military members. Characteristics important in therapists/counselors working with returning military. Doherty's second volume in this new series, *Crisis in the American Heartland*, explores these and many other issues.
