*Reaping the Whirlwind* Langdon Gilkey, 2000-01-13      *The Gift of Being* Zachary Hayes, 2017-06-15

In view of the critical environmental problems confronting the modern world reflection on the nature and meaning of the world and on humanity's place in it becomes increasingly important While Christian theology has done this for centuries the present situation calls for a serious rethinking of many issues in the light of contemporary physics biology and cultural history *The Gift of Being* presents insights of the sciences in a way that is helpful for Christians today Creation theology helps believers come to a stronger sense of their own identity as they come to an awareness of the world This enables them to gain a deeper insight into how they ought to relate to that world if they wish to find meaning in their lives This state of being requires a willingness to distinguish between the medium and the message in approaching the Scriptures It also requires a willingness to take the sciences seriously In *The Gift of Being* Hayes focuses on traditional questions of creation but also comments on where science is with creation anthropology and destiny He begins by discussing the relation between faith and reason and hence between theology and science from a historical perspective moving to the most current statements of modern Popes He follows with a summary statement of the possible retrieval of the biblical religious insights that can be distinguished from the physical worldview that stands behind much of the biblical material This allows for a discussion of the traditional concept of creation from nothing in the form of a conversation with contemporary physics He then discusses the Christian idea of God as the primal mystery of creative love from whom all of creation flows With these foundational ideas in place Hayes looks at such questions as the origin of humanity and the failure of humanity throughout history He then focuses on the tradition of cosmic Christology Finally the theological issues of the final outcome of God's creation and its history is discussed against the background of the current scientific projections of a future for the cosmos

Chapters are Science the Bible and Christianity The Vision of the Hebrew Scriptures Creation and the Christian Scriptures Creation from Nothing The Triune God the Creator Humanity in the Cosmic Context Sin and Evil Christ and the Cosmos and Creation and the Future
