Richard Mansfield, 2022-05-15 Bad things happen to good people Events not always under our control can often result in our credit scores going down and sometimes way way down There are consumer protection laws that you can use to remove negative items from your credit report Because of a quirk in the law you can as the author did remove items that really are yours But if you try to go it alone the credit repair journey can be a nightmare This book introduces a step by step credit repair system actual documents the author used to settle suits and legal cases filed in federal courts against major credit bureaus These

are the credit repair secrets they really don't want you to know from someone who successfully challenged the credit reporting industry. Contrary to what you may believe, there is a way to improve your credit score substantially, and this book will help you get there. The author was a vice president at Guardian Bank in charge of the collection department and went on to start a collection agency. After selling the agency, he became a credit restoration coach. To prove what he knew in theory could in fact be done, he stopped paying everything: repossession, foreclosure, medical bills, student loans, and credit cards. He even filed for bankruptcy. His credit score went from over 800 down to 461. He had it back to 742 in five months. Mr. Mansfield walks you through every step of the credit restoration process. As a bonus, when you purchase the book, there's information on how to contact Mr. Mansfield directly. There is no other credit restoration book like this. The Humachine Nada R. Sanders, John D. Wood, 2019-09-09. There is a lot of hype, hand waving, and ink being spilled about artificial intelligence (AI) in business. The amount of coverage of this topic in the trade press and on shareholder calls is evidence of a large change currently underway. It is awesome and terrifying. You might think of AI as a major environmental factor that is creating an evolutionary pressure that will force enterprise to evolve or perish. For those companies that do survive the silicon wave sweeping through the global economy, the issue becomes how to keep their humanity amidst the tumult. What started as an inquiry into how executives can adopt AI to harness the best of human and machine capabilities turned into a much more profound rumination on the future of humanity and enterprise. This is a wake up call for business leaders across all sectors of the economy. Not only should you implement AI regardless of your industry, but once you do, you should fight to stay true to your purpose, your ethical convictions, indeed your humanity, even as our organizations continue to evolve. While not holding any punches about the dangers posed by overpowered AI, this book uniquely surveys where technology is limited and gives reason for cautious optimism about the true opportunities that lie amidst all the disruptive change currently underway. As such, it is distinctively more optimistic than many of the competing titles on Big Technology. This compelling book weaves together business strategy and philosophy of mind, behavioral psychology, and the limits of technology, leadership, and law. The authors set out to identify where humans and machines can best complement one another to create an enterprise greater than the sum total of its parts: the Humachine. Combining the global business and forecasting acumen of Professor Nada R. Sanders, PhD, with the legal and philosophical insight of John D. Wood, Esq., the authors combine their strengths to bring us this profound yet accessible book. This is a must-read for anyone interested in AI and the future of human enterprise. *Your Score* Anthony Davenport, 2018.
