Crime and Criminality Ronald D. Hunter, Mark L. Dantzker, 2010

**Crime and Criminality** Sandie Taylor, 2015-12-22 The question of why and how certain individuals are drawn towards behaving in a way that contravenes the Law of the Land is not an easy one to address Researchers from various different fields have nevertheless attempted to develop theoretical explanations for the existence of different types of crime and why some individuals commit such acts Crime and Criminality draws on criminology sociology psychology and neuroscience to offer a balanced perspective of crime the criminal and criminality Coverage includes a comprehensive discussion of theoretical approaches to criminal behaviour including biological social and rational choice approaches an analysis of legal and social definitions of crime and how these definitions influence the way specific behaviours are labelled as criminal an examination of different types of crime and criminals from delinquents to psychopaths and sex offenders an exploration of different ways in which crime is predicted including risk assessment and offender profiling and an overview of investigative techniques Addressing a broad range of topics and offering a synthesis of competing theoretical explanations of criminality this book is essential reading for students taking courses in criminology criminal psychology criminal behaviour forensic psychology and psychological criminology

**Causes and Consequences of Migrant Criminalization** Neža Kogovšek Šalamon, 2020-07-01 The book illustrates how the trend of associating migrants and refugees with criminality is on the rise In political discourses and popular media alike migrants and refugees are frequently portrayed as being dangerous while cultures intent on welcoming newcomers are increasingly seen as being naïve and providing assistance to migrants is more and more frequently subject to administrative or criminal penalties At the same time nondemocratic trends and practices that violate human rights and equality are gaining momentum in Europe the US and Australia Racism xenophobia and anti Islamism are simultaneously becoming more open and public they are no longer restricted to clandestine platforms but are increasingly being mainstreamed into the political programs of parties that are entering both the EU parliaments and member state legislatures Similar developments can be seen in the US and Australia Such transformations in societies governments and institutions seem to reflect a growing amnesia regarding the lessons of the two World Wars of the 20th century and the role that Europe the US and Australia played in developing a post war legal framework based on a shared if imperfect commitment to human rights The book presents individual national analyses to reveal an emerging trend of criminalization regardless of the peculiarities of national legislatures and internal political dynamics By collecting original contributions from scholars based in and focused on each of these regions it addresses above all the causes and impacts of the criminalization of migration in the early 21st century It tackles the direct causes of these trends and encourages readers

to rethink their broader political and socio historic context Importantly the book does so by highlighting the ties between the criminalization of migration and equality racism and xenophobia As the politics of migration become more perilous for political alliances like the EU as well for individual migrants it is more important than ever to critically examine the cause and consequences of migrant criminalization This collection does so from a variety of disciplinary perspectives and political traditions seeking to overcome the distractions of charismatic politicians and the peculiar factions of national political systems in order to reveal the underlying trends and disturbing patterns that are of interest to a broad internationally focused audience

*The Causes and Cures of Criminality* Hans J. Eysenck, Gisli H. Gudjonsson, 2013-03-09 The title that the authors have chosen for this book *The Causes and Cures of Criminality* suggests that it may be just another book speculating on the sociological evils that need to be put right for everything in the garden to be lovely If this is the expectation the reader could not be more mistaken The recurrent theme in fact is a strong accent on psychological experiments Both authors have tackled the theoretical and practical side of crime through an exhaustive literature review of past experimental work Hans J Eysenck has concentrated on the constitutional and biological theory of criminality whereas Gisli Gudjonsson has concerned himself more with a review of ongoing research into therapy and possible prevention of antisocial behavior Part I goes into considerable detail on the causes of criminality stressing much of the strangely neglected area of individual differences in personality Research studies point to a very heavy involvement of heredity in the causation of criminality but the authors are careful to acknowledge that much can be done environmentally to discourage a life of crime once those persons who are at risk have been identified
