**Criminal Psychology** J. U. D. HANS GROSS, J. U. D.,2017-12-04 Gross noticed the faults in the justice system early on in his career His efforts focused on expanding deep investigation professional ethics and the scientific method He defined criminal psychology from a technical viewpoint considering it as pure research Along with studying a person s behaviors Gross stressed the use of careful judgment due to often misleading evidence His view of research technical evidence and methods also led to the creation of the crime scene Relating the concept of the crime scene Gross explains the necessity of balancing emotion with evidence and evidence with logic Hans fully introduced the concept of criminalistics in 1893 a period in which the notion of criminology expanded The concept of criminalistics is divided into two branches crime and political science Even though Gross found a new way in which the justice system functioned many believed the field of criminalistics proved useless except for examining justices However Gross still contributed in furthering criminology for other magistrates in law He called for the objective use and examination of evidence He stressed the importance of a judge remaining neutral in cases He did this mainly by
