Chicago 1890 The Skyscraper And The Modern City Chicago Architecture And Urbanism:

Chicago 1890 Joanna Merwood-Salisbury, 2009 Chicago's first skyscrapers are famous for projecting the city's modernity around the world. But what did they mean at home to the Chicagoans who designed and built them? Worked inside their walls and gazed up at their façades. Answering this multifaceted question, *Chicago 1890* reveals that early skyscrapers offered hotly debated solutions to the city's toughest problems and in the process fostered an urban culture that spread across the country. An ambitious reinterpretation of the works of Louis Sullivan, Daniel Burnham, and John Wellborn Root, this volume uses their towering achievements as a lens through which to view late nineteenth-century urban history. Joanna Merwood-Salisbury sheds new light on many of Chicago's defining events, including violent building trade strikes, the Haymarket bombing, the World's Columbian Exposition, and Burnham's Plan of Chicago, by situating the Masonic Temple, the Monadnock Building, and the Reliance Building at the center of the city's cultural and political crosscurrents. While architects and property owners saw these pioneering structures as manifestations of a robust American identity, immigrant laborers and social reformers viewed them as symbols of capitalism's inequity. Illuminated by rich material from the period's popular press and professional journals, Merwood-Salisbury's chronicle of this contentious history reveals that the skyscraper's vaunted status was never as inevitable as today's skylines suggest.

Chicago Makes Modern Mary Jane Jacob, Jacquelynn Baas, 2012-12-15 Chicago is a city dedicated to the modern, from the skyscrapers that punctuate its skyline to the spirited style that inflects many of its dwellings and institutions, from the New Bauhaus to Hull House. Despite this, the city has long been overlooked as a locus for modernism in the arts; its rich tradition of architecture, design, and education disregarded. Still, the modern in Chicago continues to thrive as new generations of artists incorporate its legacy into fresh visions for the future. *Chicago Makes Modern* boldly remaps twentieth-century modernism from our new-century perspective by asking an imperative question: How did the modern mind, deeply reflective yet simultaneously directed, help to dramatically alter our perspectives on the world and make it new? Returning the city to its rightful position at the heart of a multidimensional movement that changed the face of the twentieth century, *Chicago Makes Modern* applies the missions of a brilliant group of innovators to our own time. From the radical social and artistic perspectives implemented by Jane Addams, John Dewey, and Buckminster Fuller to the avant-garde designs of László Moholy-Nagy and Mies van der Rohe, the prodigious offerings of Chicago's modern minds left an indelible legacy for future generations. Staging the city as a laboratory for some of our most heralded cultural experiments, *Chicago Makes Modern* reimagines the modern as a space of self-realization and social progress where individual visions triggered profound change. Featuring contributions from an acclaimed roster of contemporary artists, critics, and scholars, this book demonstrates how and why the Windy City continues to drive the modern world.

Race and Modern Architecture Irene Cheng, Charles L. Davis II, Mabel O. Wilson, 2020-05-26 Although race, a concept of human difference that establishes hierarchies of power and domination, has played a critical role in the

development of modern architectural discourse and practice since the Enlightenment its influence on the discipline remains largely underexplored This volume offers a welcome and long awaited intervention for the field by shining a spotlight on constructions of race and their impact on architecture and theory in Europe and North America and across various global contexts since the eighteenth century Challenging us to write race back into architectural history contributors confront how racial thinking has intimately shaped some of the key concepts of modern architecture and culture over time including freedom revolution character national and indigenous style progress hybridity climate representation and radicalism By analyzing how architecture has intersected with histories of slavery colonialism and inequality from eighteenth century neoclassical governmental buildings to present day housing projects for immigrants *Race and Modern Architecture* challenges complicates and revises the standard association of modern architecture with a universal project of emancipation and progress

Understanding Tall Buildings Kheir Al-Kodmany, 2017-02-17 In recent years the rapid pace of tall building construction has fostered a certain kind of placelessness with many new tall buildings being built out of scale context and place By analyzing hundreds of tall buildings and by providing hundreds of visuals that inspire stimulate and engage Understanding Tall Buildings contends that well designed tall buildings can rejuvenate cities ignite economic activity support social life and boost city pride Although this book does not claim to possess all the solutions it does propose specific tall building design guidelines that may help to promote placemaking Through this work it is the author's hope that ill conceived developments will become less common in the future and that good placemaking will become the norm not the exception This book is a must read for students and practitioners working to create better tall buildings and better urban environments
