Ghost Child Caroline Overington, 2010-05-01 Caroline Overington's stunning fiction debut is a multi-voiced novel centred around a child's death and its terrible repercussions In 1982 Victorian police were called to a home on a housing estate an hour west of Melbourne There they found a five-year-old boy lying still and silent on the carpet There were no obvious signs of trauma but the child Jacob died the next day The story made the headlines and hundreds attended the funeral Few people were surprised when the boy's mother and her boyfriend went to prison for the crime Police declared themselves satisfied with the result saying there was no doubt that justice had been done And yet for years rumours swept the estate and clung like cobwebs to the long vacant house there had been a cover-up The real perpetrator at least according to local gossip was the boy's six-year-old sister Lauren Twenty years on Lauren has created a new life for herself but details of Jacob's death being to resurface and the story again makes the newspapers As Lauren struggles with the ghosts of her childhood it seems only a matter of time before the past catches up with her

Not Just a Victim: The Child as Catalyst and Witness of Contemporary Africa Sandra Evers, Catrien Notermans, Erik van Ommering, 2011-05-13 Social scientists examining contemporary Africa take considerable pains to resist portraying Africa as nothing more than a land of victims unable to escape historical cycles of war exploitation and tyranny However children are still frequently conceptualised as passive actors mere extensions of adult societies and receptors of culture The authors in this volume argue that children are dynamic contributors to the shaping of contemporary Africa Through novel and unorthodox ethnographic research methods each chapter provides insights into children's perspectives on kinship work caring health migration and conflict shedding light on children's views and the vital roles they play in the emerging Africa of tomorrow

Children Rights and Wellbeing in India Joseph A Gathia, Sanjay V. Gathia, 2015-01-01 India has emerged as one of the fastest growing markets in the world But what does it mean to its children Of total estimated population in 2014 as 1.236 billion nearly 28.5 % are below age of 14 years Despite such a huge child population in India the issues that affect their lives and even survival tend to receive remarkably little attention This study Children's Rights and Wellbeing in India Law Policy and Practice Volume I II and III is one among the few to address this theme on such a wide canvas that spans both time frame and issues There has been a growing interest over the past decade in the concept of child's rights among policy makers practitioners and academics in both India and internationally But does it mean the same thing to children and families as it does to policy makers How can it be measured And if it has begun to impact on government policy has it made any difference to children's lives The three-volume study Children's Rights and Wellbeing in India provide an overview of key child development policies programmes laws trends and raises pertinence

questions about their potential impact on children's rights. The challenges of improving children's well-being go beyond the provision of more effective public services important though these are. The bigger questions are how can we create a society in which children are better valued and parents better supported in bringing up their children. And what can be done to reduce inequalities which influence every aspect of children's well-being. This book makes use of a variety of sources of data including that of Govt of India, the World Bank and UN agencies particularly the UNICEF and the ILO. All the three volumes of Children's Rights and Well-being in India are an essential text for all those who want to understand the crisis threatening our children's future.

Curriculum Development for Students with Mild Disabilities Carroll J. Jones, 2010. Many teachers of students with mild disabilities experience difficulty writing IEPs and they lack a foundation in the regular education curriculum of academic skills and sequences associated with each grade level. This book was designed to provide this foundation. Presented in the form of scope and sequence charts that can be used as objectives for the State Frameworks goals and benchmarks, this resource assists in preparing IEPs including the new process of identification of children with disabilities through their responses to intervention RTI. An additional focus is on the impact of federal laws IDEA and NCLB on the curriculum and assessment in schools today. The book has been reorganized into ten chapters including historical perspectives, early childhood special education curricula, oral expression curricula, reading and listening curricula, written expression curricula, mathematics curricula, educational technology curricula, K-12 social and self-competence curricula, science curricula, and evaluation reports, case studies. Appendix. The scope and sequence charts were modified to include current national education standards and benchmarks and the skills in each of the academic areas that require annual state assessment. These charts will assist teachers in modifying the general education curriculum for students with mild disabilities and to write complete Individual Education Programs using age appropriate and developmentally appropriate teaching and assessment materials. Chapter summaries included for review purposes also serve as selective and motivational reading. With special education teachers in short supply and the demands on their time so great, this book will provide a valuable resource for cutting the clutter and moving to the heart of the teaching process, determining what skills students need to move effectively to the next level.

Everyday Social Justice and Citizenship Ann Marie Mealey, Pam Jarvis, Jonathan Doherty, Jan Fook, 2017-10-20. Social justice is a concept which is widely touted and lauded as desirable yet its meaning may differ depending on whether its focus is on the underlying values of social justice, the more specific objectives these entail, or the actual practices or policies which aim to achieve social justice. In the current global political context we need to re-examine what we mean by social justice and demonstrate that making a difference and contributing to human flourishing is more achievable than this context would suggest. The book aims to increase our sense of being able to enact social justice by showcasing different ways of contributing to social justice and making a difference in different settings and different ways. Part 1 introduces a fluid and contextual approach to social justice. Part 2 examines social justice and faith perspectives such

as Christianity Judaism Islam and community organisations Part 3 illustrates perspectives on children the family sport and local government Part IV provides perspectives of social justice in education Considering concepts of citizenship and social justice from a variety of contemporary perspectives Everyday Social Justice and Citizenship should be considered essential reading for academics and students from a range of social scientific disciplines with an interest in social justice as well as those working in education community work youth work and chaplaincy
