Birth as an American Rite of Passage Robbie E. Davis-Floyd, 2004-03-15 Why do so many American women allow themselves to become enmeshed in the standardized routines of technocratic childbirth routines that can be insensitive unnecessary and even unhealthy Anthropologist Robbie Davis Floyd first addressed these questions in the 1992 edition Her new preface to this 2003 edition of a book that has been read applauded and loved by women all over the world makes it clear that the issues surrounding childbirth remain as controversial as ever *Birth on the Threshold* Cecilia Coale Van Hollen, 2003-10-16 Publisher Description *Birthing Techno-Sapiens* Robbie Davis-Floyd, 2021-03-30 This ground breaking book challenges us to re think ourselves as techno sapiens a new species we are creating as we continually co evolve ourselves with our technologies While some of its chapters are imaginary they are all empirically grounded in ethnography and richly theorized from diverse disciplines The authors go far beyond a techno optimism vs techno pessimism stance stretching our thinking about birthing techno sapiens to consider not only how our cyborgian reproductive lives are constrained and or enabled by technology but are also about emotions and spirit The world of reproductive health care and particularly that of genetic engineering is developing exponentially and current challenges are vastly different from those of a decade ago The book is provocative intended to generate debate ideas and future research and to influence ethical policy and practice in human techno reproduction It will be of interest across the social

sciences and humanities for reproductive scholars bioethicists techno scientists and those involved in the development and delivery of maternity services

Women, Monstrosity and Horror Film Erin Harrington,2017-08-10 Women occupy a privileged place in horror film Horror is a space of entertainment and excitement of terror and dread and one that relishes the complexities that arise when boundaries of taste of bodies of reason are blurred and dismantled It is also a site of expression and exploration that leverages the narrative and aesthetic horrors of the reproductive the maternal and the sexual to expose the underpinnings of the social political and philosophical othering of women This book offers an in depth analysis of women in horror films through an exploration of gynaehorror films concerned with all aspects of female reproductive horror from reproductive and sexual organs to virginity pregnancy birth motherhood and finally to menopause Some of the themes explored include the intersection of horror monstrosity and sexual difference the relationships between normative female hetero sexuality and the twin figures of the chaste virgin and the voracious vagina dentata embodiment and subjectivity in horror films about pregnancy and abortion reproductive technologies monstrosity and mad science the discursive construction and interrogation of monstrous motherhood and the relationships between menopause menstruation hagsploitation and abject barren bodies in horror The book not only offers a feminist interrogation of gynaehorror but also a counter reading of the gynaehorrific that both accounts for and opens up new spaces of productive radical and subversive monstrosity within a mode of representation and expression that has often been accused of being misogynistic It therefore makes a unique contribution to the study of women in horror film specifically while also providing new insights in the broader area of popular culture gender and film philosophy

Health Psychology
Elizabeth D. Whitaker, 2016-12-05. This reader looks at both the biological and cultural aspects of health and healing within a comparative framework. *Health and Healing in Comparative Perspective* provides both fascinating comparative ethnographic detail and a theoretical framework for organizing and interpreting information about health. While there are many health-related fields represented in this book, its core discipline is medical anthropology and its main focus is the comparative approach. Cross-cultural comparison gives anthropological analysis breadth while the evolutionary time scale gives it depth. These two features have always been fundamental to anthropology and continue to distinguish it among the social sciences. A third feature is the in-depth knowledge of culture produced by anthropological methods such as participant observation involving long-term presence in and research among a study population. For medical anthropology, medical sociology, public health, nursing courses.

Non-Western Educational Traditions Timothy G. Reagan, 2004-09-22. This text provides a brief yet comprehensive overview of a number of non-Western approaches to educational thought and practice. Its premise is that understanding the ways that other people educate their children as well as what counts for them as education may help us think more clearly about some of our own assumptions and values and to become more open to alternative viewpoints about important educational matters. The value of this informative, mind-opening text for preservice and in-service teacher education courses is enhanced by Questions for Discussion and Reflection and Recommended Further Readings included in each chapter. New in the Third Edition: Chapter 2, *Conceptualizing Culture: I, We and The Other* is new to this edition. It is a
