

A surreal landscape with a dark, starry sky. In the foreground, a man in a blue suit stands on a dark, textured ground, looking up at a large, upward-pointing arrow. The arrow is a light gray color and contains a detailed cityscape. The text "EXECUTIVE COACHING" is written in large, bold, white capital letters across the middle of the arrow. The overall scene suggests a vision of growth and leadership.

Executive Coaching Executive Coaching:

The Psychology of Executive Coaching Bruce Peltier, 2011-04-27 With the first edition of this text Peltier drew on his extensive experience in both the clinical and business worlds to create a comprehensive resource that brought psychological and coaching concepts together. It quickly became a practical and invaluable guide for both mental health practitioners looking to expand their practice into coaching and business professionals interested in improving their own coaching skills. In this updated edition, topics reflect the latest developments in the field of executive coaching. Peltier describes several important psychological theories and how to effectively translate them into coaching strategies, essential business lessons in leadership, marketing, and the corporate viewpoint, along with vocabulary for the therapist, the challenges women face as managers and executives, and effective coaching methods for working with them, and lessons from successful athletic coaches that can be integrated into consulting skills. This edition includes four new chapters: one describing psychopathology likely to be encountered by coaches, another describes and evaluates emotional intelligence, a third summarizes adult developmental theory for coaches, and a fourth sorts out the popular and scientific literature on leadership and leader development.

Developing Leaders by Executive Coaching Andromache Athanasopoulou, Sue Dopson, 2015 This book offers an overview of the executive coaching field, what the coaching practice involves, and who are its key stakeholders. It assesses the empirical research on executive coaching outcomes and links the executive coaching field with the fields of leadership and leadership development.

Psychological Dimensions of Executive Coaching Peter Bluckert, 2006-10-16 What are the critical success factors in effective executive coaching? What are the key competencies of a psychologically informed coach? What are the similarities and differences between coaching and therapy? This book provides business coaches and management consultants with the framework for a psychological approach to executive coaching. It shows how performance-related issues in the workplace often have a psychological dimension to them and provides the reader with an understanding of how to work in more depth to help people resolve their issues and unlock their potential. It analyzes what constitutes effective coaching, stressing the importance of sound coaching principles, good coaching process, the desirable competencies of the coach, the importance of the coaching relationship, and the issue of coachability. It also examines the impact of a stronger psychological approach to coaching, exploring the key psychological competencies required, how to develop them, and the training and supervision issues implicit in this approach. A recurrent theme is the personal development of the coach throughout the coaching process, and Peter Bluckert highlights the contribution that the Gestalt perspective offers the coach through the use of self as instrument of change. Anecdotes, stories, and case samples are used throughout the book to illustrate situations so that the reader builds a picture of what psychologically informed coaching looks like and how to practice ethically, responsibly, and competently. *Psychological Dimensions to Executive Coaching* provides business and executive coaches, management consultants, human resource specialists, corporate executives, senior managers, health, social
