Drotner, 2021-06-28 Experimental Museology scrutinizes innovative endeavours to transform museum interactions with the world Analysing cutting edge cases from around the globe the volume demonstrates how museums can design apply and assess new modes of audience engagement and participation Written by an interdisciplinary group of researchers and research led professionals the book argues that museum transformations must be focused on conceptualizing and documenting the everyday challenges and choices facing museums especially in relation to wider social political and economic ramifications In order to illuminate the complexity of these challenges the volume is structured into three related key dimensions of museum practice namely institutions representations and users Each chapter is based on a curatorial design proposed and performed in collaboration between university based academics and a museum Taken together the chapters provide insights into a diversity of geographical contexts fields and museums thus building a comprehensive and

The Museums and Collections of Higher Education Andrew Simpson, 2022-12-23 The Museums and Collections of Higher Education provides an analysis of the historic connections between materiality and higher education developed through diverse examples of global practice Outlining the different value propositions that museums and collections bring to higher education the historic link between objects evidence and academic knowledge is examined with reference to the origin point of both types of organisation Museums and collections

bring institutional reflection cross disciplinary bridges digital extension options and participatory potential Given the two primary sources of text and object a singular source type predisposes a knowledge system to epistemic stasis whereas mixed sources develop the potential for epistemic disruption and possible change Museums and collections therefore are essential in the academies of higher learning With the many challenges confronting humanity it is argued that connecting intellect with social action for societal change through university museums should be a contemporary manifestation of the social contract of universities Much has been written about museums and universities but there is little about university museums and collections This book will interest museum scholars and practitioners especially those unaware that university museums are at the forefront of museological creativity It will also be of interest to academics and the growing number of leaders and managers in the modern university

Transpacific Americas Eveline Dürr,Philipp Schorch,2015-12-07 This volume explores cultural social and economic connections between the Americas and the South Pacific It reaches beyond Sino American collaborations to focus on rather neglected and sometimes invisible Southern linkages asking how these connections originated and have developed over time which local responses they have generated and what impact these processes have in the region in terms of representational forms and strategies new cultural practices and empowerment of individuals in post colonial contexts The volume also compares and contrasts intriguing parallels of politics and identity formation By extending the focus beyond East Asia to the Southern Pacific region including Island connections with the Americas the volume provides a more comprehensive understanding of recent dynamics and shifting relations across the Pacific By approaching the Transpacific Americas as an assemblage or relational space which is created and becomes meaningful through multiple localities and their translocal connections the book complicates the Euro American distinction between centre and rim While the collection offers a distinctive geographical focus it simultaneously emphasizes the translocal qualities of specific locations through their entanglements in transpacific assemblages within and across cultural social and economic spheres Furthermore without neglecting the inextricable historical dimension of anthropological perspectives the focus is on the diverse and unexpected contemporary forms of cultural social and economic encounters and engagements and on re emerging Indigenous networks Primarily based on empirical research the volume explores face to face encounters relations from below and transcultural interactions and relationships in as well as ideas and conceptualizations of cultural spaces across localities that have long been perceived as separate but are indeed closely interconnected
