

the last third of the 1990s, during the winter season of 1996-1997, the researchers, continuously, observed all of them all.

The first university-level study of the effects of the Internet on the development of the language of the common-law courts came (2000). This researcher, on the other hand, through the use of linguistic analysis, found no significant differences between cases involving the Internet and those that do not. In the future, if the legal research community truly has changed, it will be seen more changes in the structure, more precisely, it will be seen that the common-law research is a digital, along with

Exit Utopia ,2005 *Historical Dictionary of Utopianism* Toby Widdicombe,James M. Morris,Andrea Kross,2017-06-21 Utopian thinking embraces fictional descriptions of how to create a better but not a perfect alternative way of life as well as intentional communities that is groups of people leading lives in small communities for their own betterment and the betterment of others The first edition almost exclusively dealt with the intentional community side of utopianism this second edition offers a much more inclusive definition of the key term utopia by offering a great many entries devoted to describing fictional or literary utopian works It is also heavily illustrated with plates from utopian works especially those from the heyday of utopianism in the late nineteenth century This second edition of *Historical Dictionary of Utopianism* contains a chronology an introduction appendixes and an extensive bibliography The dictionary section has over 1000 cross referenced entries on broad conceptual entries narrower entries about specific works and narrower entries about specific intentional communities or movements This book is an excellent resource for students researchers and anyone wanting to know more about Utopianism

2018 Günter Berghaus,Domenico Pietropaolo,Beatrice Sica,2018-04-09 The eighth volume of the *International Yearbook of Futurism Studies* is again an open issue and presents in its first section new research into the international impact of Futurism on artists and artistic movements in France Great Britain Hungary and Sweden This is followed by a study that investigates a variety of Futurist inspired developments in architecture and an essay that demonstrates that the Futurist heritage was far from forgotten after the Second World War These papers show how a wealth of connections linked Futurism with Archigram Metabolism Archizoom and Deconstructivism as well as the Nuclear Art movement Spatialism Environmental Art Neon Art Kinetic Art and many other trends of the 1960s and 70s The second section focuses on Futurism and Science and contains a number of papers that were first presented at the fifth bi annual conference of the European Network for Avant Garde and Modernism Studies EAM held on 1 3 June 2016 in Rennes They investigate the impact of science on Futurist aesthetics and the Futurist quest for a new perception and rational understanding of the world as well as the movement's connection with the esoteric domain especially in the field of theosophy the Hermetic tradition Gnostic mysticism and a whole phalanx of Spiritualist beliefs The Archive section offers a survey of collections and archives in Northern Italy that are concerned with Futurist ceramics and a report on the Fondazione Primo Conti in Fiesole established in April 1980 as a museum library and archive devoted to the documentation of the international avant garde and to Italian Futurism in particular A review section dedicated to exhibitions conferences and publications is followed by an annual bibliography of international Futurism studies exhibition catalogues special issues of periodicals and new editions

Practicing Utopia Rosemary Wakeman,2016-04-01 The typical town springs up around a natural resource a river an ocean an exceptionally deep harbor or in proximity to a larger already thriving town Not so with new towns which are created by decree rather than out of necessity and are often intended to break from the tendencies of

past development New towns aren't a new thing ancient Phoenicians named their colonies Qart Hadasht or New City but these utopian developments saw a resurgence in the twentieth century In *Practicing Utopia* Rosemary Wakeman gives us a sweeping view of the new town movement as a global phenomenon From Tapiola in Finland to Islamabad in Pakistan Cergy Pontoise in France to Irvine in California Wakeman unspools a masterly account of the golden age of new towns exploring their utopian qualities and investigating what these towns can tell us about contemporary modernization and urban planning She presents the new town movement as something truly global defying a Cold War East West dichotomy or the north south polarization of rich and poor countries Wherever these new towns were located whatever their size whether famous or forgotten they shared a utopian lineage and conception that in each case reveals how residents and planners imagined their ideal urban future

Transgressive Design Strategies for Utopian Cities Bertug Ozarisoy, Hasim Altan, 2023-03-24 This book critically examines the philosophy of the term transgression and how it shapes the utopian vision of contemporary urban design scenarios The aim of this book is to provide scholarly yet accessible graphic novel illustrations to inform narratives of urban manifestos Through four select case studies from the UK Cyprus and Germany the book highlights the paradoxes and contradictions in architecture and provides detailed evaluation of the limits and contemporary forms of sustainable urban regeneration The book proposes an utopian urban vision approach to social political and cultural relations trends and tensions both locally and globally and seeks to inspire an awakening in architectural discourse The book argues that the philosophical undermining of transgression is the result of a phenomenon from a different perspective its philosophical background social construction experimental research process and design implications on the city As such the book provides a critical examination of how architectural design interventions contribute to sustainable urban regeneration and gentrification and can impact local communities This book provides a significant contribution to both undergraduate and postgraduate students as well as early career researchers working in architecture planning and sustainable urban design It offers effective guidance on adopting the state of the art graphical illustrations into their own design projects while considering contradictions between architectural discourse and the philosophy of transgression

Reyner Banham and the Paradoxes of High Tech Todd Gannon, 2017-09-05 Reyner Banham and the Paradoxes of High Tech reassesses one of the most influential voices in twentieth century architectural history through a detailed examination of Banham's writing on High Tech architecture and its immediate antecedents Taking as a guide Banham's habit of structuring his writings around dialectical tensions Todd Gannon sheds new light on Banham's early engagement with the New Brutalism of Alison and Peter Smithson his measured enthusiasm for the clip on approach developed by Cedric Price and the Archigram group his advocacy of well tempered environments fostered by integrated mechanical and electrical systems and his late career assessments of High Tech practitioners such as Norman Foster Richard Rogers and Renzo Piano Gannon devotes significant attention to Banham's late work including fresh archival materials related to *Making Architecture* The Paradoxes of High Tech the

manuscript he left unfinished at his death in 1988 For the first time readers will have access to Banham's previously unpublished draft introduction to that book

The Stack Benjamin H. Bratton, 2016-02-19 A comprehensive political and design theory of planetary scale computation proposing that The Stack an accidental megastructure is both a technological apparatus and a model for a new geopolitical architecture What has planetary scale computation done to our geopolitical realities It takes different forms at different scales from energy and mineral sourcing and subterranean cloud infrastructure to urban software and massive universal addressing systems from interfaces drawn by the augmentation of the hand and eye to users identified by self quantification and the arrival of legions of sensors algorithms and robots Together how do these distort and deform modern political geographies and produce new territories in their own image In *The Stack* Benjamin Bratton proposes that these different genres of computation smart grids cloud platforms mobile apps smart cities the Internet of Things automation can be seen not as so many species evolving on their own but as forming a coherent whole an accidental megastructure called The Stack that is both a computational apparatus and a new governing architecture We are inside The Stack and it is inside of us In an account that is both theoretical and technical drawing on political philosophy architectural theory and software studies Bratton explores six layers of The Stack Earth Cloud City Address Interface User Each is mapped on its own terms and understood as a component within the larger whole built from hard and soft systems intermingling not only computational forms but also social human and physical forces This model informed by the logic of the multilayered structure of protocol stacks in which network technologies operate within a modular and vertical order offers a comprehensive image of our emerging infrastructure and a platform for its ongoing reinvention The Stack is an interdisciplinary design brief for a new geopolitics that works with and for planetary scale computation Interweaving the continental urban and perceptual scales it shows how we can better build dwell within communicate with and govern our worlds thestack.org

Oswald Mathias Ungers and Rem Koolhaas Lara Schrijver, 2021-10-07 Lara Schrijver examines the work of Oswald Mathias Ungers and Rem Koolhaas as intellectual legacy of the 1970s for architecture today Particularly in the United States this period focused on the autonomy of architecture as a correction to the social orientation of the 1960s Yet these two architects pioneered a more situated autonomy initiating an intellectual discourse on architecture that was inherently design based Their work provides room for interpreting social conditions and disciplinary formal developments thus constructing a plausible relationship between the two that allows the life within to flourish and adapt In doing so they provide a foundation for recalibrating architecture today

Architecture Competitions and the Production of Culture, Quality and Knowledge Jean-Pierre Chupin, Carmela Cucuzzella, Bechara Helal, 2015-01-26 Winner of the 2016 Bronze medal in Architecture Independent Publisher Book Awards This book comprises a series of 22 case studies by renowned experts and new scholars in the field of architecture competition research In 2015 it constitutes the most comprehensive survey of the dynamics behind the definition organization judging archiving and publishing of architectural landscape and urban design

competitions in the world These richly documented contributions revolve around a few questions that can be summarized in a two fold critical interrogation How can design competitions these historical democratic devices both praised and dreaded by designers be considered laboratories for the production of environmental design quality and ultimately for the renewing of culture and knowledge Includes 340 illustrations bibliographical references and index of over 200 cited competitions

Architecture, Crisis and Resuscitation Tahl Kaminer,2011-01-20 Studying the relation of architecture to society this book explains the manner in which the discipline of architecture adjusted itself in order to satisfy new pressures by society Consequently it offers an understanding of contemporary conditions and phenomena ranging from the ubiquity of landmark buildings to the celebrity status of architects It concerns the period spanning from 1966 to the first years of the current century a period which saw radical change in economy politics and culture and a period in which architecture radically transformed substituting the alleged dreariness of modernism with spectacle

Re-Framing Identities Ákos Moravánszky,Torsten Lange,2016-12-19 From 1970 1990 architecture experienced a revision as part of the post modern movement The critical attitude to the functionalistic Moderne style and the influence of semiotics and philosophical trends such as phenomenology on architectural theory led to an increased interest in its history expression perception and context In addition architectural heritage and the care of architectural monuments gained importance This development also increasingly challenged the ideologically based division between East and West Instead of emphasizing the differences the search was for a joint cultural heritage The contributions in this volume question terms such as Moderne and post modern and show how architecture could again represent local regional and national identity

Capsules: Typology of Other Architecture Peter Šenk, 2017-10-12 This book investigates the architectural product design and urban typology of the capsule which beginning in the 1960s broadened the concept of the basic building blocks of architecture to include a minimal living unit called the capsule Here it is presented with regard to the continuity of the development of the Modern Movement its revisionist criticism pioneering examples as well as contemporary examples and uses The typology of the capsule allows us to consider this theme in terms of the architecture of resistance with the potential to search for an other architecture that

is embedded in our contemporaneity manifested in small dwellings composite structures and container units shelters and mobile homes in nature and the urban environment technology transfer in high tech designs devices additions and extensions etc The concept of the capsule as a building element of architecture as well as a spatial element can therefore be regarded as having a generative potential for an architecture of personal space for the individual forcing us to reflect on our existing living and dwelling conditions

Architectures of Sound Michael Fowler, 2017-10-23 Architects are used to designing visually In order to expand their basic design tools this book explores the interactions between sound space hearing and architecture To this end the author uses contemporary and historic buildings and projects but also fictional philosophical and theoretical approaches the idea is not only to define sound as a source but also as an instrument of architectural space By introducing a metatheory of critical hearing designers are able to acoustically test their projects and contribute to their design with auditive input already at the design stage
