## **Explaining The Crisis A Marxist Re Appraisal:**

*Explaining the Crisis* Chris Harman, 1984 Since the early 1970s the world economy has been in a state of acute instability Now the world seems to be facing the most serious crisis of all as the much proclaimed free market teeters on the brink of collapse In this newly reprinted classic account of Marxist economics the author explains the essential elements of Marxist analysis and applies these insights to an explanation to what has happened in the world economy over the century since Marx's death

**Against the Crisis** Ståle Holgersen, 2024-11-26 Capitalism produces crises and crises reproduce capitalism We need an ecosocialist way out If crisis defines our era we need a coherent socialist policy in response Ståle Holgersen delves into today's economic and ecological crises to demonstrate that they are not exceptions to an otherwise functioning system but integral to its operation It is naive to see these upheavals as opportunities for reform or revolution They are the bedrock of the status quo Fortunately the vicious circle sustaining capitalism is not founded on an iron law Our historical mission in the face of the climate crisis is to create a historical exception to the rule It is time for ecosocialism against crisis

The Destruction of the Soviet Union D. Lockwood, 2015-12-22 Is there a link between the collapse of the Soviet Union the radical reforms in China and Vietnam and the current crisis in East Asia David Lockwood argues that the common factor in each is the crisis of state controlled economies besieged by the developing forces of globalization This book examines the collapse of the Soviet Union not as the end of history or the beginning of a new world order but as an illustration of processes that are taking place the world over The author concludes that it was globalization that brought down the communist system Globalization continues to threaten state controlled economies from the remaining socialist state to the NICs of East Asia

A History of Marxian Economics, Volume II Michael Charles Howard, John Edward King, 2014-07-14 This second volume completes a critical history of the social political and theoretical forces behind Marxian economics the only work in English to offer such comprehensive treatment Beginning with Marxian analyses of the Great Depression and Stalinism it explores the theories developed to explain the long boom in Western capitalism after the Second World War Later chapters deal with post Leninist theories of imperialism and continuing controversies in value theory and the theory of exploitation After outlining recent work on the second slump the integration of rational choice theory into Marxism and the political economy of socialism the book concludes with a review and evaluation of Marxian theory over the whole period since Marx's death Praise for the first volume Howard and King have done an excellent job One comes away with the impression of Marxian economics being a vibrant subject relevant to the problems of these times and useful in practical matters Meghnad Desai *The Times Higher Education Supplement* Originally published in 1992 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found

in the thousands of books published by Princeton University Press since its founding in 1905      Critical Systems Thinking Robert L. Flood, Norma R.A. Romm, 2007-08-28 This volume offers comprehensive treatment of the latest developments in critical systems thinking and practice The book features contributions by researchers at the prestigious Centre for Systems Studies at the University of Hull England The emphasis is on rigorous analysis of the wide range of approaches to problem solving reported in the research literature This work will enhance the studies of researchers and students in the areas of systems problem solving action research management science and operational research      Marxism and Criminological Theory Mark Cowling, 2008-11-03 This volume looks at Marxist thought in criminology the work of Willem Bonger Georg Rusche and Otto Kirchheimer and assesses the role of Marxist analysis in areas such as Critical Criminology and Left Realism Arguing that Marxism is relevant in the post Soviet era it offers a toolkit of Marxist theories and how to use them

**Contagion Capitalism** Sean Creaven, 2023-12-15 Contagion Capitalism situates the COVID 19 pandemic within the systems of global political economy and their attendant cultural modes and theorizes that these systems act as facilitators and drivers of global pandemic risk Contagion Capitalism therefore critiques the institutionalized corporate capitalist control of the economy the state and science and the grave consequences this has on global public health policy the ecological crisis of sustainability and zoonotic pandemic events such as COVID 19 In doing so this book addresses the failings of what may be termed as state science or establishment science in managing the pandemic as personified especially by those elements of the scientific elite placed in the service of the neoliberal state This book also explores the limitations of corporate pharmacological technoscience in safeguarding public health arguing that Big Pharma offers only partial remedies for problems of human illness and well being poses its own dangers to public health and obfuscates the social bases of public ill health and of pandemic risk Contagion Capitalism further argues that COVID 19 will not be the last or even the most dangerous such epidemiological event This is because the social production and global dissemination of zoonotic diseases is integral to contemporary capitalism by virtue of its instrumental mode of science its central dynamic of production for the sake of accumulation and the consumer mode this sustains as its own condition of existence These are the drivers of what may be termed as zoonotic accelerationism Contagion Capitalism will appeal to scholars in the humanities and social sciences with interests in neoliberal ideology and global political economy and their impact upon social political and cultural life      A Radical History of the World Neil Faulkner, 2018-09-20 History is a weapon The powerful have their version of events the people have another And if we understand how the past was forged we arm ourselves to change the future This is a history of struggle revolution and social change of hominids hunters and herders of emperors and slaves of patriarchs and women of rich and poor of dictators and revolutionaries From the ancient empires of Persia and Rome to the Russian Revolution the Vietnam War and the 2008 Crash this is a history of greed and violence but also of solidarity and resistance Many times in the past a different society became an absolute necessity Humans have always struggled to create a better life

This history proves that we the many have the power to change the world      **Critical Education Against Global Capitalism** Paula Allman, 2001-04-30 In today's vernacular Marx outed capitalism well over a century ago but his explanation has been both ignored and misinterpreted by not only his detractors but also by many socialists and even a considerable number of Marxists as well Today we are experiencing the full impact and suffering the repercussions of capitalism's inherent need to become more than ever before a fully internationalized and integrated system of socio economic control and domination the global system that many commentators have suddenly remembered Marx and Engels 1848 presciently forecasted in the Communist Manifesto When the Berlin Wall fell in 1989 the victory of capitalism and liberal democracy was triumphantly proclaimed The Cold War was over and we were promised a lasting peace But as we enter the third millennium we are facing escalating social divisions injustice and oppression with an environment in varying stages of ecological decay Daily we are bombarded by the schizoid media images of capitalism's extremes on television news the ravaged faces and wasted bodies of some of the thousands suffering famine or the millions living in the world's slums and then the gleaming yet vacuous smile and sumptuously adorned figure of some extravagant wealthy individual who is one of the select members of the global upper class Are we becoming conditioned to accept such contrasts and regard them as normal and inevitable at a time when we have the potential to eliminate scarcity and eradicate human deprivation The author argues that critical education is needed to form a movement capable of challenging and then transforming capitalism She also offers an accessible account of Marx's dialectical critique and expos of capitalism clearly demonstrating the real enemy that should be the focus of anti capitalist and anti globalization struggles This is an account that explains why our main focus should not be on greedy individual capitalists or particular multinational corporations or even their handmaiden institutions such as the World Bank IMF WTO etc but instead the global network of capitalist social relations and consequent habituated human practices in which we are all involved These together with the historically specific form of capitalist wealth are the real enemy the essence of capitalism that must be abolished in order for humanity to have any hope of social and economic justice in the future      Dissident Marxism Dave Renton, 2004-04-08 David Renton argues that the roots of today's anti capitalist movement can be found in the life and work of an earlier generation of socialist revolutionaries who shared a commitment to socialism from below Soviet poet Mayakovsky Marxist philosopher Karl Korsch Georges Henein and others

*The Global Development Crisis* Benjamin Selwyn, 2014-02-07 The central paradox of the contemporary world is the simultaneous presence of wealth on an unprecedented scale and mass poverty Liberal theory explains the relationship between capitalism and poverty as one based around the dichotomy of inclusion into capitalism vs exclusion from capitalism Within this discourse the global capitalist system is portrayed as a sphere of economic dynamism and as a source of developmental opportunities for less developed countries and their populations Development policy should therefore seek to integrate the poor into the global capitalist system The Global Development Crisis challenges this way of thinking Through an

interrogation of some of the most important political economists of the last two centuries Friedrich List Karl Marx Leon Trotsky Joseph Schumpeter Alexander Gerschenkron Karl Polanyi and Amarta Sen Selwyn argues that class relations are the central cause of poverty and inequality within and between countries In contrast to much development thinking which portrays the poor as reliant upon benign assistance this book advocates the concept of labour centred development Here the poor are the global labouring classes and their own collective actions and struggles constitute the basis of an alternative form of non elitist bottom up human development

**The Death of Social Democracy** Ashley Lavelle,2016-03-09 Whereas many writers and scholars interested in the field of social democracy have focused on factors such as the role of economic globalization and electoral pressures Ashley Lavelle explores the importance of the collapse of the post war economic boom and lower growth rates since then He examines how these pressures have led social democrats to embrace neo liberal policies and become threatened by minor parties and independent politicians Providing an original argument about the decline of social democracy the author investigates how its decline has increased the popularity of minor parties and independents along with the reasons for social democratic membership and electoral decline This is an important book for scholars of social democracy and the broader themes of world politics political parties social movements and globalization

*The New Age of Catastrophe* Alex Callinicos,2023-04-05 The world is entering a new age of catastrophe The exceptional is becoming normal The last such crisis between 1914 and 1945 witnessed two world wars the Great Depression and the Holocaust Now humankind faces fresh existential threats the COVID 19 pandemic wildfires floods and other extreme weather events caused by accelerating climate change and the danger of nuclear war in the wake of Russia s invasion of Ukraine These threats argues Alex Callinicos have their common source in a multidimensional crisis of the capitalist system which is hitting the buffers hurling us towards societal collapse It embraces the increasing destruction of nature and the degradation of labour a world economy stagnant since the global financial crisis and escalating inter imperialist conflicts between the United States China and Russia So far the main political beneficiary has been the far right which may capture the White House again But the new age of catastrophe is also an age of revolt Following on from Black Lives Matter the MeToo protests and the revolts in Sudan Sri Lanka and Iran multiple faultlines in the system will provoke still more mass movements that can challenge myriad forms of oppression and open the way to a just and sustainable world

**Arresting Development** Craig Johnson, 2008-11-28 Scholars have become increasingly concerned about the impact of neo liberalism on the field of development Governments around the world have for some time been exposed to the forces of globalization and macro economic reform reflecting the power and influence of the world s principal international economic institutions and a broader commitment to the principles of neo classical economics and free trade Concerns have also been raised that neo classical theory now dominates the ways in which scholars frame and ask their questions in the field of development This book is about the ways in which ideologies shape the construction of knowledge for development A central theme concerns the impact of neo liberalism on contemporary development theory and research The book s main objectives are twofold One is to understand the ways in which neo liberalism has framed and defined the meta theoretical aims and assumptions of what is deemed relevant important and appropriate to the study of development A second is to explore the theoretical and ideological terms on which an alternative to neo classical theory may be theorized idealized and pursued By tracing the impact of Marxism postmodernism and liberalism on the study of development Arresting Development contends that development has become increasingly fragmented in terms of the theories and methodologies it uses to understand and explain complex and contextually specific processes of economic development and social change Outside of neo classical economics and related fields of rational choice the notion that social science can or should aim to develop general and predictive theories about

development has become mired in a philosophical and political orientation that questions the ability of scholars to make universal or comparative statements about the nature of history cultural diversity and progress To advance the debate a case is made that development needs to re capture what the American sociologist Peter Evans once called the comparative institutional method At the heart of this approach is an inductive methodology that searches for commonalities and connections to broader historical trends and problems while at the same time incorporating divergent and potentially competing views about the nature of history culture and development This book will be of interest to scholars and students of Development Social and Political Studies and it will also be beneficial to professionals interested in the challenge of constructing knowledge for development
