Childhood Psychosis Initial Studies And New Insights:

Childhood Psychosis: Initial Studies and New Insights Leo Kanner, 1973 This book comprises 16 papers presented in chronological sequence and covering three decades of study from 1943 to 1973 *Martian in the Playground* Clare Sainsbury, 2009-10-02 This deceptively little book contains more truth and provides more insight into what it is like to have Asperger's Syndrome than many a weighty tome on the subject It offers a view from the inside but it is not yet another autobiography Admirably and refreshingly the author has refrained from giving an account solely based on her own experiences Instead she sets out observations from 25 different sufferers giving often astonishing and sometimes harrowing glimpses of what actually happens to a child with Asperger's Syndrome in the classroom in the playground in the lunch queue and at home The Journal of Child Psychology and Psychiatry This award winning book illuminates what it means to be a person who has Asperger's Syndrome by providing a window into a unique and particular world Drawing on her own experience of schooling and that of a network of friends and correspondents who share her way of thinking and responding Clare Sainsbury reminds us of the potential for harm which education holds for those who do not fit This book holds insights that take us beyond the standard guidance on how to manage autistic spectrum disorder It challenges the way we might handle obsessional behaviour It invites us to celebrate the pure passion of the intellect which such obsessions can represent and to recognise the delight which can be experienced by children who love to collect It reminds us that many of the autistic mannerisms we might try to suppress actually help the child to think This revised edition includes an additional introduction and extensive summary of research in the field of Asperger's Syndrome both by Tony Attwood Autism and Asperger Syndrome Uta Frith, 1991-10-17 In this volume several of the major experts in the field discuss the diagnostic criteria of Asperger syndrome Far From the Tree Andrew Solomon, 2012-11-13 Selected as One of the Best Books of the 21st Century by The New York Times WINNER of the National Book Critics Circle Award Books for a Better Life Award The New York Times Book Review's 10 Best Books of the Year This masterpiece by the National Book Award winning author of *The Noonday Demon* features stories of parents who not only learn to deal with their exceptional children but also find profound meaning in doing so a brave beautiful book that will expand your humanity People Solomon's startling proposition in *Far from the Tree* is that being exceptional is at the core of the human condition that difference is what unites us He writes about families coping with deafness dwarfism Down syndrome autism schizophrenia or multiple severe disabilities with children who are prodigies who are conceived in rape who become criminals who are transgender While each of these characteristics is potentially isolating the experience of difference within families is universal and Solomon documents triumphs of love over prejudice in every chapter All parenting turns on a crucial question to what extent should parents accept their children for who they are and to what extent they should help them become their best selves Drawing on ten years of research and interviews with more than three hundred families Solomon mines the eloquence of ordinary people facing extreme challenges

Elegantly reported by a spectacularly original and compassionate thinker Far from the Tree explores how people who love each other must struggle to accept each other a theme in every family's life

Principles and Practice of Child Psychiatry Stella Chess, Mahin Hassibi, 2013-06-29 Stella Chess's many admirers throughout the world have long looked forward to the day when she would produce her own textbook of child psychiatry They will not be disappointed in this thoughtful and perceptive account of the principles and practices of the subject written in collaboration with Dr Hassibi It has all the hallmarks we have come to recognize as distinctive of the Chess approach to child psychiatry gentle yet subtle and penetrating always appreciative of the feelings and concerns of both the children and their parents well informed and critically aware of research findings but far from overawed by the contributions of science and above all immensely practical Anyone who wants to know how one of the world's outstanding clinicians appraises what child psychiatry has to offer could do no better than to read this book Child psychiatry differs from general psychiatry in being concerned with a developing organism and it is entirely appropriate that the book begins with an account of child development and of the principal theories put forward to explain it Chess and Hassibi recognize the importance of theory in organizing ideas and in suggesting explanations but they remain skeptical of how far existing theories do in fact account for the outstanding issues in development They note the limitations of all theories in explaining how development takes place and why individual differences occur in the way they do

Every Child Can Learn Katrin Stroh, Thelma Robinson, Alan Proctor, 2008-04-18 Includes CD Rom Based on the authors own clinical practice and extensive experience in the field this book is a creative and flexible aid to helping children with learning difficulties Their accessible and positive approach Functional Learning focuses on helping children learn children's potential and what they can rather than cannot do It is based on the purposeful doing by the young child and can be carried out at home school or the therapy room with either parents teacher or therapist The approach which is cross cultural can be extended to all aspects of the child's life and enables them to participate in everyday activities at home and school Fully illustrated the book draws extensively on the authors many years of practical work and offers techniques and activities used to help children develop their learning with a focus on Development of Learning Tools Working with parents Language and communication Behaviour and emotional development Integration of learning into everyday life The book includes a CD Rom DVD with printable material for making cards and worksheets plus illustrative video material This book is suitable for anyone working with or caring for a child with learning difficulties or with autistic spectrum disorders for SEN teachers and SENCOs early years training teacher training and child development courses as well as parents Recommended video resources Learning and Communication http://www.concordmedia.org.uk/products/learning_and_communication_programmes_for_developmentally_delayed_children 568 Understanding Understanding http://www.concordmedia.org.uk/products/understanding_understanding 1157
