Children at the Birth of Empire Kristen McCabe Lashua, 2023-04-28 This is the first study to focus specifically on destitute children who became part of the early British Empire uniting separate historiographies on poverty childhood global expansion forced migration bound labor and law Britons used their nascent empire to employ thousands of destitute children launching an experiment in using plantations and ships as a solution for strains on London's inadequate poor relief schemes Starting with the settlement of Jamestown 1607 and ending with Britain's participation in the Seven Years War 1756-1763 British children were sent all around the world Authorities parents and the public fought against the men and women they called spirits and kidnappers who were reviled because they employed children in the same empire but without respecting the complexities surrounding children's legal status when it came to questions of authority consent and self-determination Children mattered to Britons protecting their liberty became emblematic of protecting the liberty of Britons as a whole Therefore contests over the legal means of sending children abroad helped define what it meant to be British This work is written for a wide audience including scholars of early modern history childhood law poverty and empire

Youth Sport, Migration and Culture Max Mauro, 2019-01-15 How do migrant youth negotiate their role in society through sport and leisure practices How can political theory and qualitative critical research work together to make sense of these processes These are among the questions that led to a long-term investigation of young males' sport practices in Ireland possibly the most fertile contemporary setting for the analysis of questions of sport and identity Youth Sport Migration and Culture emphasises the epistemological and ethical urgency of doing research with rather than on young people Engaging with the social changes in Irish society through the eyes of children of immigrants growing up in Ireland the book looks closely at young people's leisure practices in multi-ethnic contexts and at issues of inclusion in relation to public discourses around national identity and immigration Offering compelling analysis of how ideas of race and racism are elaborated through sport this book is fascinating reading for anybody with an interest in the sociology of sport sport development or youth culture

spaces of care caring and care giving The provision of care is widely figured as both the primary responsibility of parents carers and practitioners who work with children and young people and the primary factor in shaping children and young people s development education socialisation wellbeing and contentment However children and young people themselves are rarely figured as key actors in the provision of care An overwhelming presumption that children and young people are to be cared for has effectively marginalised their agency and responsibilities as carers or in relation to practices and spaces of care Bringing together a significant array of multidisciplinary work on children young people and families this collection draws together new research on the diverse lives and experiences of children and young people as carers as cared for and in relation to spaces and institutions of care It is the first collection specifically devoted to the subject of care in relation to childhood and youth As such the book will be a key resource for academics practitioners and students seeking leading edge empirical and conceptual material on this topic Children, Childhood, and the Future Andrea

Kleeberg-Niepage,2020-01-10 Although most of the world s children live in the Global South much of the corpus of scientific knowledge which forms the basis of the current notion of good childhood worldwide is drawn from research on Western middle class children Even cross cultural research often applies the Western model of childhood as the standard to which others must correspond This volume serves to bridge this gap by both bringing up significant features of the development and socialisation of children in African countries and presenting cross cultural procedures which help to discuss and develop differentiated and joint ideas about childhood instead of implementing one sided standards which are disconnected from most children s lives **Migration and Making an Income in the Context of 'Human Trafficking'** Anna S.

Hüncke,2023-06-09 The book focuses on volatile processes at the South African Zimbabwean border that arise from practices of migration and income generating activities The processes are influenced by neoliberal developments and controversial discourses on migration commercial sexual services and human trafficking In this unstable environment different actors continuously negotiate trying to achieve stable positions By addressing issues related to migration and income generating activities they maneuver between legal rules and their own moral values and interests In their attempt to classify incidents in the border context that are unclear to them actors explanations are partly based on the concept of transnational human trafficking Thereby they transfer the impenetrability discursively associated with this concept to what they see as obscure cross border migration disconcerting sexual services and other alienating economic activities Alternatively actors understand undocumented cross border migration commercial sexual services and other illegalised income generating activities as common everyday practices at the border and also assume that human trafficking does not play an important role there

**Children and Forced Migration** Marisa O. Ensor, Elżbieta M. Goździak, 2017-02-23 This book responds to the reality that children and youth constitute a disproportionately large percentage of displaced populations worldwide It demonstrates how their hopes and aspirations reflect the transient nature of their age group and often differ from those of their elders It also examines how they face additional difficulties due to the inconsistent definition and uneven implementation of the traditional durable solutions to forced migration implemented by national governments and international assistance agencies The authors use empirical research findings and robust policy analyses of cases of child displacement across the globe to make their central argument that the particular challenges and opportunities that displaced children and youth face must be investigated and factored into relevant policy and practice promoting more sustainable and durable solutions in the process This interdisciplinary edited collection will appeal to students and scholars of forced migration studies development conflict and peace building and youth studies along with policy makers children s rights organizations and NGOs **Contested**

psychology      **Routledge Handbook of Childhood Studies and Global Development** Tatek Abebe, Anandini Dar, Karen Wells, 2024-08-28 The Routledge Handbook of Childhood Studies and Global Development explores how global development agendas and processes of economic development influence children's lives. It demonstrates that children are not only the frequent targets or objects of development but that they also shape and influence processes of economic, political, and sociocultural development. The handbook makes the case for the importance of placing children at the heart of development debates and demonstrates how researchers, policymakers, and practitioners can engage children in development. Through reports on field research as well as a critical engagement with theories in development studies and childhood studies, contributors contest normative assumptions about childhood and global development. They tease out and tease apart the complex social, historical, cultural, economic, epidemiological, ecological, geopolitical, and institutional processes transforming what it means to be young in the world today. Showcasing research from both established scholars and early career researchers and with particular prominence given to the work of authors from the global south, this book will be an essential reference for policymakers, practitioners, and for researchers and students across childhood studies, education, geography, sociology, and global development.

**Trafficked Children and Youth in the United States** Elzbieta M. Gozdzia, 2016-05-10 Trafficked children are portrayed by the media and even by child welfare specialists as hapless victims who are forced to migrate from a poor country to the United States where they serve as sex slaves. But as Elzbieta M. Gozdzia reveals in *Trafficked Children in the United States*, the picture is far more complex. Basing her observations on research with 140 children, most of them girls from countries all over the globe, Gozdzia debunks many myths and uncovers the realities of the captivity, rescue, and rehabilitation of trafficked children. She shows, for instance, that none of the girls and boys portrayed in this book were kidnapped or physically forced to accompany their traffickers. In many instances, parents or smugglers paid by family members brought the girls to the U.S. Without exception, the girls and boys in this study believed they were coming to the States to find employment and, in some cases, educational opportunities. Following them from the

time they were trafficked to their years as young adults Gozdziaik gives the children a voice so they can offer their own perspective on rebuilding their lives getting jobs learning English developing friendships and finding love Gozdziaik looks too at how the children s perspectives compare to the ideas of child welfare programs noting that the children focus on survival techniques while the institutions focus not helpfully on vulnerability and pathology Gozdziaik concludes that the services provided by institutions are in effect a one size fits all trauma based model one that ignores the diversity of experience among trafficked children Breaking new ground Trafficked Children in the United States offers a fresh take on what matters most to these young people as they rebuild their lives in America *Childhood and Nation* Zsuzsanna Millei,Robert Imre,2016-04-29 Childhood and Nation explores the historical and manifold current relations between nation and childhood Millei and Imre bring together an international and interdisciplinary group of scholars to address many pressing questions of today The analytical incisions created by nation and childhood bring answers to the following questions How do national agendas related to economic social and political problems exploit children and tighten their regulation How do representations of nations take advantage of ideals of childhood Why do nations look to children and search for those characteristics of childhood that help them solve environmental and humanitarian issues The book offers a fresh look at the theme of nation and childhood by offering multiple methodologies from fields including education policy studies political science sociology anthropology literature and psychology *Growing Up Muslim in Europe and the United States* Medhi Bozorgmehr,Philip Kasinitz,2018-07-27 This volume brings together scholarship from two different and until now largely separate literatures the study of the children of immigrants and the study of Muslim minority communities in order to explore the changing nature of ethnic identity religious practice and citizenship in the contemporary western world With attention to the similarities and differences between the European and American experiences of growing up Muslim the contributing authors ask what it means for young people to be both Muslim and American or European how they reconcile these at times conflicting identities how they reconcile the religious and gendered cultural norms of their immigrant families with the more liberal ideals of the western societies that they live in and how they deal with these issues through mobilization and political incorporation A transatlantic research effort that brings together work from the tradition in diaspora studies with research on the second generation to examine social cultural and political dimensions of the second generation Muslim experience in Europe and the United States this book will appeal to scholars across the social sciences with interests in migration diaspora race and ethnicity religion and integration
